

A SERENDIPITOUS CALIBRATION EXPERIMENT IN EYEWITNESSING AN EXTRAORDINARY APPARITION

*What should the thousands of eyewitness reports
of the Nov 7, 2015 Trident SLBM launch off
California teach investigators about evaluating
OTHER similar wide-area 'UFO reports'?*

**THIS IS PRELIMINARY REPORT
SO ANY REFERENCES TO IT OR
QUOTATIONS FROM IT SHOULD
BE VERIFIED THAT THERE HAVE
BEEN NO FURTHER UPDATES**

REVIEW DRAFT 2

MISSILE LAUNCH WESTWARD FROM SUB OFF SAN DIEGO

The Great Trident Sub-Launched Missile California Freak-Out of Nov 7, 2015 [and what it can teach us about UFO witnesses]

James Oberg
November 16, 2015
Draft-2

THIS REPORT IS A
SUPPLEMENT TO
MY ORIGINAL
REPORT ON THE
NOV 7, 2015
TRIDENT SLBM TEST
OFF CALIFORNIA
AND THE PUBLIC
PERCEPTIONS OF IT

[_http://satobs.org/seesat_ref/misc/misperceiving_missiles.pdf](http://satobs.org/seesat_ref/misc/misperceiving_missiles.pdf)

CHARACTERISTICS OF LAUNCH-PLUME APPARITIONS

- RARE – SO ONCE-IN-A-LIFETIME FOR MOST WITNESSES
- CAN OCCUR IN DAWN OR DUSK TWILIGHT
- USUALLY HUNDREDS OF KILOMETERS HIGH SO CAN BE SEEN WIDELY
- INITIAL VERTICAL MOTION LEAVES NARROW PLUME OFTEN NOT FULLY SUNLIT
- ENDO-ATMOSPHERIC [<100 km] PLUME LINGERS AND IS QUICKLY KINKED BY CROSSWINDS
- IN SPACE, PREDOMINANTLY HORIZONTAL MOTION [UP TO 500 KM/MINUTE]
- PLUME WIDENING APPEARS ABOVE ~ 100 km [THE 'KARMAN LINE']
- HIGH SPEED OF EJECTED PLUME [~ 3 KM/SEC]
- POTENTIAL LARGE SIZE OF PLUME [UP TO ~ 200 KM LONG]
- ANY VIEWING ANGLE POSSIBLE [HEAD-ON TO FULL-SIDE ASPECT]
- PLUME IS TRANSLUCENT SO MOTION DIRECTION [TOWARD OR AWAY] IS AMBIGUOUS
- RAPID DISPERSAL AND FADING OF EXO-ATMOSPHERIC [>100 km] PLUME
- PLUMING START/STOP CAN LEAVE SHARP BOUNDARIES
- USUALLY [NOT ALWAYS] DOCUMENTED WITH ACKNOWLEDGED MISSILE/SPACE ACTIVITY
- UPPER STAGE/WARHEAD THRUSTING/SPINNING CAN LEAVE COMPLEX PATTERNS
- MULTIPLE THRUSTING OBJECTS WITH SPACEX LAUNCHES [AND MAYBE OTHERS]
- FAILURES IN FLIGHT HAVE THEIR OWN UNIQUE MANIFESTATIONS NOT DISCUSSED HERE

REPORT METHODOLOGY

- THE FUNDAMENTAL CHALLENGE OF UFOLOGY IS TO ASSESS HOW ACCURATELY CAN EYEWITNESS TESTIMONY ABOUT ONCE-IN-A-LIFETIME SUDDEN SKY APPARITIONS BE BACKTRACKED TO ACTUAL FEATURES OF THE SOURCE OF THE VISUAL STIMULUS
- ASSUMPTIONS, HAND-WAVING, AND WISHFUL THINKING IS THE NORMAL APPROACH
- ACTUALLY CONDUCTING FIELD EXPERIMENTS SEEMS PROHIBITIVE BOTH FROM LOGISTICAL, TEST SUBJECT RECRUITMENT, AND ETHICAL PERSPECTIVES
- **SPECTACULAR TWILIGHT MISSILE LAUNCHES HAVE ENTIRELY BY ACCIDENT OFFERED RESEARCHERS A SERENDIPITOUS OPPORTUNITY TO CALIBRATE ACTUAL PERCEPTIONS**
- THE FOLLOWING COLLECTION OF EYEWITNESS DESCRIPTIONS REFLECTS RESULTS OF THE NOV 7, 2015 TRIDENT MISSILE TEST WEST OF SOUTHERN CALIFORNIA AS POSTED ON INTERNET DISCUSSION GROUPS AND VIDEO COMMENTS
- THE INTENT IS TO LET THE WITNESSES SPEAK VIA SELECTIONS OF TYPICAL COMMENTS TO SEEK REPEATED AND MOST COMMON WITNESS PERCEPTIONS/INTERPRETATIONS
- THE GOAL IS THAT AFTER SEEING THESE PATTERNS, SERIOUS INVESTIGATORS WILL NEVER LOOK AT SIMILAR WIDE-AREA WITNESS NARRATIVES NAIVELY AGAIN
- THIS MAY BE A NAÏVE HOPE, BUT TIME – AND WIDER PUBLIC AWARENESS – WILL TELL

COMMON FEATURES OF REPORTS

- TIME ESTIMATES OFF BY UP TO AN HOUR OR MORE
- 'SUDDENLY APPEARED' IN MID-AIR, THEN DISAPPEARED
- VIEWING DIRECTION OFTEN FAR OFF
- FLIGHT PATH DIRECTION SOMETIMES SERIOUSLY OFF
- "DIRECTLY OVERHEAD" WHEN HUNDREDS OF KILOMETERS AWAY
- STRANGE SHAPES INCLUDING SPIRALS
- ASSUMPTION CLOUD WAS SELF-LUMINOUS [NOT SUNLIT]
- ROCKET ENGINE PLUME INTERPRETED AS SEARCHLIGHT BEAM
- FLIGHT PATH [ACTUALLY STRAIGHT] SEEN TO SWERVE & KINK
- COINCIDENTAL FEATURES NOTED [AIRCRAFT, SOUNDS, SMELL]
- OCCASIONAL PHYSIOLOGICAL EFFECTS ['EYES BURNING']
- RECORDING DEVICES SOMETIMES REPORTEDLY MALFUNCTIONED
- SOMETIMES FEELINGS OF FEAR OR DOOM
- OFTEN, EXULTANT FEELING OF BEING PRIVY TO 'SECRET' EVENT

MISSILE MISINFORMATION

- NOT FLOWN OVER POPULATED AREA
- NOT ANNOUNCED
- SHOULD GIVE OFF SOUND OR SONIC BOOM
- SHOULD GO STRAIGHT UP
- 'GLOWING' OR LUMINESCENT CLOUDS ARE ACTUALLY SUNLIT DUE TO ALTITUDE AND TIME-OF-DAY
- Tbs

WHAT THE WITNESSES GOT RIGHT

- DESPITE GROSS ERRORS IN MOTION AND SIZE/DISTANCE, OTHER FEATURES OF THE MISSILE LAUNCH WERE WIDELY DESCRIBED ACCURATELY
- THE SEQUENCE OF EVENTS SUCH AS STAGING AND LATER WARHEAD DEPLOY WERE OFTEN NOTED AND DESCRIBED RECOGNIZABLY
- THE COLOR OF THE EXOATMOSPHERIC PLUME – BLUE – WAS OFTEN GIVEN, WHICH IS THE EXACT COLOR OF THE SUNLIT PLUME OF SOLID FUEL USED IN MILITARY MISSILES
- REPORTS OF 'SEARCHLIGHT' OR 'HEADLIGHT' FORMS ARE EXCELLENT DESCRIPTIONS OF SUNLIT ROCKET PLUMES, COMMON FOR DECADES
- TBS

NO DISRESPECT INTENDED TOWARDS WITNESSES

- ONCE-IN-A-LIFETIME UNEARTHLY OBSERVATIONS ARE VERY RARE
- NORMAL REACTION -- AMBIGUOUS SIGHTINGS INSTINCTIVELY INTERPRETED IN TERMS OF PREVIOUS EXPERIENCES
- OBSERVATIONS OF POTENTIALLY HIGH DANGER OR POTENTIALLY HIGH VALUE OFTEN REMEMBERED MOST VIVIDLY
- DISTANCE ESTIMATES BASED ON GUESSED SIZE OF OBJECT
- EXPERIENCES INTERPRETED TO REFLECT WITNESS STATUS
- INTERPRETATION BASED ON PREVIOUS DESIRES TO OBSERVE
- NARRATIVE SHAPED BY DESIRE TO IMPRESS LISTENERS
- **ALL THESE FEATURES ARE PERFECTLY NORMAL AND ARE CHARACTERISTICS OF CLASSIC INTERPRETIVE, MNEMONIC, AND NARRATIVE PROCESSES**

SIGNIFICANCE TO UFO INVESTIGATIONS

- UNDERSCORES SCOPE OF DIFFICULTY IN RECONSTRUCTING A REPORTED OBJECT'S MOTION, DISTANCE, ETC WHEN STIMULUS IS UNKNOWN
- REVEALS DEGREE TO WHICH A WITNESS'S PREVIOUS EXPERIENCES AND ATTITUDES CAN SHAPE SELECTION/ENHANCEMENT OF VISUAL FEATURES
- "LOOKED LIKE X" ANALOGIES CAN SUBTLY ALTER ORIGINAL MEMORY VIA RETELLING SO AS TO SUBCONSCIOUSLY ADD OTHER FEATURES OF 'X'
- ESTIMATES OF RANGE AND SIZE ARE BASED ON PURE GUESSES
- CAUSALITY WITH PURELY COINCIDENTAL EVENTS IS COMMON BUT UNJUSTIFIED
- DESCRIPTIONS OF MOTION ACROSS THE SKY OFTEN WILDLY INACCURATE
- MOST SIGNIFICANTLY, THESE RESULTS CAST DOUBT ON THE VALIDITY OF FACILE ASSUMPTIONS OF SUFFICIENT WITNESS ACCURACY TO ELIMINATE CANDIDATE PROSAIC EXPLANATIONS, TO PROVE 'EXTRAORDINARINESS'
- **THE OBSERVED WITNESS PERFORMANCE DOES NOT 'PROVE' SUCH SIMILAR REPORTS ELSEWHERE ARE 'WRONG', MERELY THAT THEY COULD BE**

POTENTIALLY WIDER SIGNIFICANCE

- DEGREE TO WHICH WITNESSES MISUNDERSTAND BASIC VISUAL FEATURES OF ROCKETS IS DISMAYING 60+ YEARS INTO THE 'SPACE AGE'
- DEGREE TO WHICH SUCH EXPERIENCES ENCOURAGE CONSPIRATORY THEORIES AND KNEE-JERK DISTRUST IS DEPRESSING AND ALARMING
- CREDIBILITY OF FUTURE OBSERVATIONS OF GENUINE AERIAL MYSTERIES [SUCH AS AIRCRAFT ACCIDENTS, FIREBALLS, SPRITES] IS DIMINISHED
- NEED FOR GREATER PUBLIC AWARENESS OF PROPER OBSERVATION TECHNIQUES IS UNDERSCORED – MEASURE ANGLES, DIRECTIONS, TIMING
- VALUE OF COLLECTING AND RECORDING AND DISSEMINATING AND EVALUATING ALL ANOMALOUS AERIAL PHENOMENA IS CONFIRMED
- JUSTIFICATION OF CAUTION IN ACCEPTING WITNESS'S INSISTANCE ON ACCURACY ["I-KNOW-WHAT-I-SAW"] AT FACE VALUE IS UNDERSCORED,
- **BETTER METHODS OF EFFECTIVE CORRECTIVE ANALYSIS STILL NEEDED**

APPROACH TO PRESENTATION OF THE RAW DATA

- 1 == COLLECTION OF LENGTHY QUOTATIONS FROM EYEWITNESSES DIRECTLY, IN NO PARTICULAR ORDER [LINKS PROVIDED]
- 2 == COMMENTS ABOUT INTERPRETATIONS AND STATE OF MIND
- 3 == RELIGIOUS AND PARANORMAL INTERPRETATIONS OMITTED
- 4 == MANY COMMENTS WERE FROM OBSERVERS WHO ACCEPTED THE MISSILE EXPLANATION, THESE ARE GENERALLY ALSO OMITTED
- 5 == NOT A FORMAL 'OPINION POLL' SO NO STATISTICAL ANALYSIS
- 6 == COMMENTATORS ARE SELF-SELECTED FOR STRONG VIEWPOINTS
- 7 == PARTICULAR PHRASING IS HIGHLIGHTED TO ALLOW SCANNING
- 8. == OCCASIONAL SPELLING CORRECTIONS FOR CLARITY & PG-13 RATING
- 9. == BRIEF SUMMATION AND DISCUSSION AT END OF REPORT

COVER-UP!!! MASSIVE TIME PORTAL OPENS UP OVER LA!!! Thousands Witness Shocking UFO EVENT!

Comments https://www.youtube.com/watch?v=BQkJ_tnmk0A

- Daniel Marquez == i seen it **right above my head** Im from fresno,ca I was on fresno street and Clinton it was not no missile or a comet it didn't make any noise and moved very slowly and **then a beam of light came out of it** then some different color beam came out in the middle of the other beam. I watched it as it slowly took off leaving a stain in the clear night sky that stayed there for about five minutes and I kept watching it as it got further away I could see **that same beam come off of it again when it was far away** like it was looking for something it looked like it was probing the earth I don't care what anyone says I know it wasn't from our planet and before that day I didn't even believe in aliens or anything supernatural cause I believe in what I can see and touch and this I saw with my own eyes
- S Silva == I was in Oakdale CA this day. I have a Nephew that plays for the youth football team. I seen this thing.... It was on a Saturday between 8:30/9pm. I was caught up in the game and didnt see it until my family members out of no where said. What is that? So I look to the southwest direction and I seen it. I even looked at the people around me just to make sure I wasnt seeing sh1t. I wasnt.... The whole fking stadium was looking. So my brothers and mother asked what I thought. They know that I have some interest in this particular subject. My response was at first a military craft. I seen the light move so I said its probably a missle or small meteor. So than this thing **stops and just elevated and disappeared**. When it vanished it seemed as if it pearced thru a thick cloud. It was cloudy like, **more like a fog**. On my way home it was stuck in my head. This is the first I had ever seen anything like that. I heard the next few days it was a private plane which to me was BS. I heard missle which I also thought was BS. some said a Droid but I think it was to big for it to be a Droid. It was very weird..... **Missles dont travel in two different directions come to a dead stop and elevate at a speed so fast that it disappeared. Leaving the cloud pearced with a hole.** No comet moves like that either. A heat seeking missle yeah. But there was nothing in the sky for it to chase.

Comments https://www.youtube.com/watch?v=BQkJ_tnmk0A

- Eddie Mosqueda == The cover up for that mysterious light sounds "so ignorant" considering Im here in **Las Vegas NV**. WHAT EVER IT IS WAS SO HIGH IN THE ATMOSPHERE IT COULD BE SEEN IN CALI & LV AT THE SAME TIME CAUSE **IT WASNT MOVING FOR A GOOD COUPLE A MINUTES** IT SEEMED
- Mjack19 == It was very black in Laguna Beach. My view is Catalina...**the bar of lights we saw first horizontal then we noticed the blue cloud which was behind the row lights that turned into vertical lights and thens some white spritzers**. I also saw red lights from below the water in front of our house all too dark to get pictures as if extra dark was put over the night at 6pm...
- Rachel Ahrens == it left a blue glow in the sky for a long time after it left. or disappeared. I didn't see windows like that dude. but it was **stationary bright light then it started moving slowly for a short distance**. then disappeared leaving the bright blue trail. **it was right over my head**. its just funny how many people are tripping out over seeing this. if they got off their devices and looked up in the sky once in a while the California skies have been covered with this type of thing for a long time. But no one notices but this is actually one of a kind thing that I have never seen before.

comments

- TheFlyestNavajo == I seen this wit my own 2 eyes in Millbrae, CA. **It looked like a spot light was coming down from the sky.** NO WAY IN HELL was it a missile. There was a blue streak in the sky way after the white smoke dissipated.
- C Chester == Those who have yet to awaken wouldn't understand but i instantly recognized this as a portal. I was waiting for someone else to upload a video to confirm my theory. Im in touch with a lot of spiritual beings and those who didn't even see the phenomena texted me in the morning stating they had a bad feeling or had apocalyptic dreams that night. If you do research on interdimensional beings , the occult , or even CERN.. you'd instantly recognize a portal and this isn't the first of its kind to be documented.. but its not for everybody to grasp their head around...most people are so afraid to think for themselves or do substantial research for the truth, that they will defend the very system that enslaves them .. mentally, physically and spiritually.

UFO Rocket Ship Over San Francisco Bay Area 2015

<https://www.youtube.com/watch?v=OJYAuJZM89U>

UFO San
Francisco

Glenn
Cameron

July 6, 2017 // 19:32 gmt

- Jaamesd88 == I saw it from north of berkeley, it looked like it had a neon green/blue **beam of light coming out of the middle of the cone**. I originally thought it was a search helicopter lighting up the fog **with its light**, but there is no fog tonight. It then **turned off its light** and appeared to fly towards the Golden Gate Bridge, where **it turned its light on again**, and did crazy stuff at a distance. The green neon light/fog/residue from the "beam" lingered for a few minutes.... It was a little lighter here than in LA (I'm further west and 300 miles north) so it looked a little different. **It looked as though the rocket flew north along the coast, then turned north-east** roughly over SF. I was on the phone with my mom the whole time.
- valentine ramirez == this is what I don't get it wasn't coming in our direction as it seemed to dissappear above Los Angeles. yet, the view from san diego, was just a ball of light u could not see the whole blue streak left behind. same this we saw in sf/sj, so how were we able to get a full view of it, as if it were near is in the bay area? **it would need ro be very very high up and huge, and it wasnt**. check the photos from the space station it was not high up. maybe it was a the same one ? in 2 spot? all the videos that pooped up on instagram FIRST were from Northern California it took about 5 min before I saw any videos from l.a. also, many ufo clusters were filmed all during that time between northern and southern California
- <https://www.youtube.com/watch?v=OJYAuJZM89U>

UFO over San Diego? 11/7/15

<https://www.youtube.com/watch?v=zmV-ZdbB13A>

- Christopher Lucas [Published on Nov 7, 2015]
- Video taken in Chula Vista at my sisters house on her birthday. This thing **trailed smoke and exploded and left a blue/violet mist**. You can see it explode.... You can't tell (even though this is shot in 4K iPhone) there was an **initial streaking artifact** with smoke trailing behind it (in the video I had said it looked like a rocket, which I had seen in Iraq during the invasion of 2003 (in the form of SCUD middles) my brother-in-law pointed it out and my gut instinct said to start filming.

Video One - UFO over Phoenix - 11/7/2015

<https://www.youtube.com/watch?v=99FpYVl1KBU>

- BooMOzz [Published on Nov 7, 2015] == The perspective at which we saw this. It appeared to be coming right at my wife and I. At first when I first saw it I thought it was a helicopter with a spotlight on it. Then it started acting erratic in motion and didn't hear a sound. Then It got super bright, with a white halo that expanded outward. Then it jumped got dim then disappeared. Leaving the blue smear
- Chance Trahan == Whatever this was came from the Squaw Peak mountains and flew directly over us towards downtown Phoenix. This was a UFO. It had its own cloud and didn't leave clouds behind. People are seeing this all the time in this area right when the sun goes down. It's not a missile. It was completely silent. The light is what was leading the UFO. It was not trailing behind it. It was very big and low flying.
- Alfredo Salinas == I saw it from Mesa, kind of spiral, and tiny light came from it.
- Boo -- We missed the first half of it. Had to go get the camera. Saw pretty much the same exact thing. That halo that radiated off of it was amazing. I really have no idea what we witnessed.
- =====

Helicopter View of UFO over Los Angeles

<https://www.youtube.com/watch?v=TxdHFWp7TB0>

Everardo Uribe [Nov 7, 2015] == We were on a helicopter heading south from downtown LA along the 110 South around 5:50 PM when we saw a bright light in the sky. It seemed to have a contrail initially then it began flashing and brightened as you can see in the video. We were talking to the LAX control tower but they had no idea what was going on and they were freaking out.

San Clemente, CA - UFO? Naval test fire? 11/7/2015

<https://www.youtube.com/watch?v=6LDOa3bjLQs&t=12s>

- Chad Pratt == **Orange fireball** streaking across the sky, then turned **bright white and expanded into a cloud of vapor/gas that covered the entire sky** and left behind a green glow for about 10 minutes. Just before ignition, a **small red flashing light fell off** of the trail of the Fireball. My neighbor can be heard at the beginning saying he saw it **hovering over the ocean** prior to this video. This is shot in San Clemente about 2 miles off the coast just north of Camp Pendleton looking N, NW (toward Catalina).
- =====
- <https://www.youtube.com/watch?v=36ahzeV9WHY>
- Escazu CostaR == Saw it in Tucson come in son saw it first was bright as the moon son said " dad why is the **moon moving so fast?** " he is six. I looked up and saw it move west had **plume and blue laser or light** behind it! Was not a missi[le] I m a Navy Photographer missiles leave trails! Rockets leave trails this was no Rocket! It Was amazing yet scary ! I will never forget this night! It was traveling to fast! And bright ! Saw it exactly at 7:00 pm Tucson AZ time !

<https://www.youtube.com/watch?v=00H1yDzt83s>

- Gabby == I'm not sure what type of missile launch this is but it sure didn't look like it. I have never been aware of any type of missile launch that **can be seen across the entire state of California and parts of Colorado, Arizona and Hawaii**? When I saw it I sure didn't think missile and it gave me a creepy feeling.
- Sumerianharp == I'm in Arizona and I saw it but **it was not moving**. It was smaller than the moon... Much smaller yet much larger and brighter than stars and **it lingered without moving then it disappeared**
- Drezzi Gashouse == just look at it... that is not a missile that is clearly something else there is no way the military will launch missiles over a populated area I am surprised at your reaction on this video I was a fan of your page but not anymore I mean while I'm like **how much did you get paid to say that this was a missile** come on man smh missile my ass!!
- =====
- <https://www.youtube.com/watch?v=k7fgHpYtZsE>
- tamaphenom == Driving back from Big Bear Lake, we spotted a **small yellow light** low in the sky moving slowly. Moments later, it **elongated significantly and seemed to move faster**. Pulling over, the light had become small and yellow once again, but slowly started turning **blue**. By the time I got the camera out, it had already **started to expand** into a luminous blue spectacle. 20-27 seconds into the clip, you can clearly see **a projectile of some type being propelled forward**.

SCARY Truth Behind Mass California UFO Sighting 11/11/2015

184,053 views / secureteam10 / Published on Nov 11, 2015

<https://www.youtube.com/watch?v=00H1yDzt83s>

- Mares == I witnessed this driving back to California at Utah Nevada Border. **Lit up the Sky**. No Missile. Very VERY STRANGE EVENT!!
- Stephen Ureke == Although you have some valid points, trident midsoles dont come FROM OUTER SPACE, then **orbit for 10 minutes, float in place** for 3 mins, and disappear...
- FearlessFoxX == I don't know about it being a Missile, Becuase it **passed over** here in Fresno California and that night there was so many helicopters in the sky and police and my girlfriend said she was laying down and she felt **a slight shake and noise**, and it made her think becuae the neighborhood is always quiet , so she went outside and looked up and what she saw... Was quite crazy She reported seeing a pitch black dark octogan shaped object flying in the sky very low, infact **so low she said she thought it was literally gona hit the tree**, and even more crazy she said there was a couple helicopters chasing it and apparently the helicopters lights were off but you can hear them in the sky!I remember hearing so many helicopters flying around that night

https://www.youtube.com/watch?v=H6Q_ClcItVk

- Scott Kleven == I saw this with my own eyes **since when do missiles stop in the sky for five fuc4ing minutes** after it done with its light show and doesn't move I don't think so
- JC Chainz == I saw the same thing **over my house in Corona** and they are saying its a rocket test Bullsh1t !
- Frank Butsch == I witnessed this from San Bernardino. Started off as a orange fireball with a flaming tail. Then turned into a **huge illuminating bright white light** that lit the entire night sky as whatever the object was raced towards the North West part of the California sky! I thought that we were done for!
- Clexaholic911 == that's exactly how I saw it to it had **a firey sparkly red tail** and then got **bigger and bluer and whiter** and then this big white explosion got **super bright** and then continued a little and **I saw pieces dissolve and break off** so crazy. Missile my ass though! It looked like **it changed directions** and was so huge!
- Mila Lesui == Lol smh it's not a missile nore is it a ufo it's a Comet and just because the "Media "says it's a missile test ok **I ain't never seen a missile do that** besides, how does a missile leave a blue tail in the back of it and **how does a missile form white mist** so active?? the Blue tail is called a ion tail yall need to do research before jumping to conclusions and believe the lies the media reports

MASSIVE BLUE UFO SIGHTING OVER LA, OC, SD, and Beyond!

<https://www.youtube.com/watch?v=FUiW4oBKym8>

- FaceLikeTheSun == Published on Nov 8, 2015 // 98,807 views
- On the evening of 11-7-2015 around 6pm, **a massive UFO** was spotted over Orange County, LA County, San Diego, and as far as Nevada, Idaho, and even New Mexico. Official reports came out saying this was the NAVY testing some missiles. But is that true? Some reports suggest this was a trident missile. But video footage of previous trident missiles **look nothing like it**. And even if it is military, why are they testing these missiles, and why when everyone can see them? Furthermore, it has been reported by a personal witness, as well as the news, that LAX will change their flight path in the coming weeks because of a military drill happening in the pacific ocean. If it was simply a military exercise, why so much deviation for flights? This raises more questions and suspicion than it does comfort those who research this material. What do you think it was?
- Simply Different == Military says it was a missile, but this going **way too slow** for that. I don't believe this was a missile, they must lie to civilians. Why should they shoot a missile in the area **right under a civilian airplane**? That's crazy, that's forbidden, also km lower then the plane. If a military missile explodes then all is falling down by gravity, and **don't dissappear high in the sky**

Major UFO Sighting in Los Angeles November 2015

<https://www.youtube.com/watch?v=nCVQubbHDro>

- Alex Browning == i was in the desert when this happened, **so bright** it was alien, because when it was done it left **a turquoise streak** in the sky and **it fell and went up and turned right**
- Not Sure == I saw this in az and reports came as far as Ensenada Mexico meaning this was in outer space. I describe this experience as if it was **a giant mag light shining down observing** I thought the thing was falling at one point I thought maybe a rocket but by the size of the light and how it reacted I don't think it was.

Proof aliens exist ! Real footage!

Alexis Mendez == Published on Nov 7, 2015

<https://www.youtube.com/watch?v=G-zuX90JtQ8>

- What the fuc4 is this ? It looked crazier in person I only caught half of it. It looked like **the moon with a flashlight** at first then **a blue beam of light** & than this [slowly faded away moving towards tha left] ! Wtf is this ... Tha aliens are coming .. Strange mysterious blue light in the sky .. News reports cannot confirm what this was they all say something different.. I've heard test rocket & comet .. But it was seen in all different areas . in my opinion it could only be two things ... Project blue beam or aliens .. What do you think this was? I'm in Ventura county, that was no rocket . I seen it from beginning to end & **it did not originate from the ground up it started in the middle of the sky** like a **flashlight** & took off **south** ... it did not start from the ground & go up **it went sideways** ... a rocket missile originates from tha ground up not from tha left of tha sky tuh tha right of tha sky ... tell me wuht kinda rocket missile starts in tha middle left of tha sky & moves right ? NONE... a rocket moves from tha ground tuh tha sky not from tha left of tha sky tuh tha right of tha sky ... **thas just using common sense** .
- elliot burgeson == It was like **a flashlight in the sky**

Strange light in Riverside, Ca SKY 11/07/15

<https://www.youtube.com/watch?v=k60U5ujqyNE>

- SER9901 == Published on Nov 7, 2015
- Bright white light appeared in the sky expanding its radius and leaving a blue light trail. Once **it turned to the right** it looked like something (small light) detached from the main light. Has anyone seen something like this? Can anyone tell me what this could be? Did anyone see this in Riverside CA around Tyler mall on Saturday 7,2015 around 6pm?
- =====
- Puppet String News == It like froze it the sky then it gave off these like rings that exploded from it then the sky turned blue after it dissipeard, and before it looked like a heilo.
- stretch '== I CAN TELL YOU FOR SURE IT WASNT A MISSLE IT WAS A LIGHT IT JUST FADED INTO A VERTICAL CLOUD HEADING NORTHWEST
- <https://www.youtube.com/watch?v=bKVmFElezFE>

November 7th 2015 UFO **searching with beam light**
<https://www.youtube.com/watch?v=MYLEm4OTkT4>

- Vanessa Samorano == My brother and his friends recorded this video as well as other videos and took pictures on November 7th 2015. They **said it was close and looked like it was searching.** They believed it was a UFO. This was in Patagonia, Arizona
- thatsImpossible == I saw this at (2 o'clock -spatially) driving on i880 south (bay area) around 6pm. I thought it might be **a descending plane's lights while penetrating through clouds..** however it was a bit strange & interesting to see for sure. It lasted a while and was more dramatic in illumination than seen in video. I had a really good view.
- OrvinApparel == Also in Utah **it stopped and then went straight up**, not a rocket.
- marslave575 == if you believe its a missile then why isn't anyone showing **real evidence** of it before and after take off? or even the junk that comes from it **the metal of the missile** it self should be close by
- Timberwolf Music == Not likely. I saw it in the central valley. **The cone of light & the blue tail.**

More <https://www.youtube.com/watch?v=MYLEm4OTkT4>

- Tjaty AHATI == Show me a missile that has **a blue tail for long periods of time**? I believe you are still drinking mainstream media juice time to detox off the government's lying bullsh1t
- Richie Rodrigues == I saw this in Monterey California, and I've seen a bunch of other people pictures and videos, they all look really similar.. This angle is very interesting. I saw it make one of those **swirls**, and **the beam of blueish green light behind it was super unreal**.. The more videos I see the less I believe that it's a missile
- Arisa Paez == I think its a UFO because **if it was a missile u wouldn't be able to see everywhere at the same time**
- LongShot Jacob == i saw that at my house in lemon Grove it Disappeard **when it came by near my house.**
- justingeturgun == i seen this with my own eyes .. i was in east sandiego about 30 miles from the beach .. and **it was comming toward me** ..as i looked up .. this aint no rocket how it moved .
- Sharad Sinha == That is a **Police search helicopter in a foggy sky**. The color spectrum is created due to refraction of light due to fog.
- Jill Velarde == We s33n it in san bernardino too...**my camera woodnt pick it up**.. A couple different people said they saw an explosion in the sky...
- drew rosecrans == its a missal from a navy ship **it flew ri[ght] over us** here in sierra madre

UFO sighting? Strange lights west of Escondido CA

<https://www.youtube.com/watch?v=NWvNRegJXus>

- Curly Fride [Published on Nov 7, 2015] == Weird strange wtf light who the hell knows what it is omg wtf I'm scared someone call Jesus or something because it is end times I'm sure of it this time guys don't laugh at me!
- Vivian C == Yes, I saw it, tonight at 6 p.m. Same exact. Have the video also. Before I recorded it, the object looked yellow, **like a cone of light**, then **a blue circle projected out** while it moved away.
- =====
- Tameron Miles == that was a ufo...I live in Las Vegas and saw the entire event...that object **made NO sounds**...it was completely silent **hovering in the sky**. I called my brother who lives in Long Beach and told him what I saw and he told me people in California witness the same light. now remember, I'm in Las Vegas, Nevada, how in the HELL could that be **a missile traveling that far from state to state**??? PEOPLE we are not alone. don't believe that cover up story...I'm surprised they didn't say it was "a weather balloon". what you witness was a GENUINE UFO and I'm glad to say **I too SAW it with my own eyes in the sky**...missiles my ass...what's next...a giant **flash light** will be the new cover up story...

GAME CHANGER! UFO Sightings DARPA DAMAGE CONTROL!!

THIS IS BIG-TIME! // 281,503 views // <https://www.youtube.com/watch?v=amC5aS1FWYc>

- Jonathan Pontel == I was at porter ranch in the valley and this sh1t was **right over me**... this wasn't a missile I know people don't want to believe me but that thing was a UFO it was **projecting a light downwards** like in a movie... it was insane I'm not going to lie I was a bit scared lol... I tried taking a video of it on my phone **but it wouldn't show anything on it** like as if it controlled what was being recorded idk I really don't all I know is what I saw.... missile??? jeez that's the best they can do now with the lame excuses
- Neon Fox Productions == +Jonathan Pontel Same thing happened to me! **I tried opening my phone and it froze up**, I had to reset my phone and by the time I got it up and running again it already dissipated.
- Jonathan Pontel == it couldn't be a missile dude that object was **just hovering** after it made that blue, greenish cloud in the sky. Believe what you want, I know what I saw... missile's don't just "hover" around in the sky.
- Jonathan Pontel == +ReneeNme sure, **then explain the aura it possessed** around itself for a good 3-5 min... I kept an eye on that "missile" you supposedly say it was and it just kept wondering away in the sky. Missile's come down, not hover. Period. There's no illusion here. ... I'm not delusional, I'm not on drugs I'm in 3rd semester of nursing school about to start 4th in Feb 2016 I think I'm pretty knowledgeable about what I see and what is perceived to be delusional...
- jamiela91 == Yea that's what I noticed that things got a hell **of a spot light** which rockets don't

<https://www.youtube.com/watch?v=amC5aS1FWYc>

- Jonathan Pontel == +Zx4unit the object wasn't in outer space, and **there was no sun as it was already passed sunset**... like I said, this sh1t was **right above me**...
- CANE == It's a UFO. because on the KTLA News they reported or a missile launch off the pacific coast of a Navy Ship. CBS news reports say it was a astroid. Fox 11 News said it was a UFO because people heard a sonic boom. 1. A Navy Missile Doesn't Travel over 12,000 ft. in the air... plus **it would of blown up at a specific time**. 2. Astroids have a greenish color surrounding it then as it fades away it turns to a light hot red orange color. 3. Ufos have been sighted every where... In one of these clips it looks exactly like the UFO sighted in China of 2010. Government is lying.
- Do Mo == **Rockets when they fly they fly fast** as sh1t. This is going **slow** as hell. Rockets have fire/light source coming from the back **the lights coming from the front**. I'm not saying it's aliens but I know it's not a rocket.
- Regina Shrabel == It's not only one place, it was in Fresno, far from L.A. not even headed towards the west. **It hovered over us and was then heading north**
- indy Banks == I can't believe they were that high up. They shoot off missiles in Florida at the Cape you don't see it all over the state. But I saw the videos in both places. **So it had to be huge** and very high to be seen that far away. Not a normal missile.

<https://www.youtube.com/watch?v=amC5aS1FWYc>

- geo linkin == sorry but every missile footage I have seen showed **the missile streaking at way higher velocities**. Besides, why does the military and their spokespersons wait until after everyone lights up 911 in LA?! fishy to me. also, **missiles are not tested over civilian airspace**. they are tested at specific military installations. but the public also believes 9 1 1 was concluded by a kidney-diseased cave-dweller. our govt knows we are stupid F's! we take it all...hook line and sinker. they laugh at us.
- Johnny Gonzalez == Trident II Nukes do not spur a blue flare. **It would have left a huge vapor and smoke trail**. I've seen trident tests before. go ahead and look at trident 2 videos and judge... Object seen over 500+ miles away is too big for a trident 2. media reports it was a trident II and supposedly fell in the ocean. this thing **was headed inland** and not the ocean. also if it was a secret launch why would the military expose this to the general public? I'm not saying this is alien, but definitely some sort of new technology.
- F-450 6.7 PowerStroke == Look at missiles on videos **they go faster** then a fighter jet... **They don't have a light**, and they can't shoot over civilian land. Submarines don't shoot missiles that get out the water, it stays in the water

Rational explanation offered....

<https://www.youtube.com/watch?v=amC5aS1FWYc>

- Mike == I had no idea the Trident missile had a "hover" and "slow" function.
- Jim o == I'm a retired rocket scientist who's noticed a troubling chasm between how we understood our work, and what we found out there, and how the public perceives and interprets it based on different experiences and exposures -- Hollywood, video games, over-simplistic media blather,. all-is-well bureaucratic pronouncements, you name it. I try to find ways to explain the genuinely unearthly nature of what we perceived, and how the new conditions in space -- vacuum, motion, illumination, etc -- totally overthrew the instinctive visual cues we were used to, needing a lot of thought to assemble new, reliable cues. These videos -- twilight rocket launches, ice and fuel dumps in orbit, stuff zipping and zig-zagging in and out of existence in front of the cameras -- justifiably puzzled millions of people. An entire new mythology of exploration has arisen, most of it erroneous, some of it pernicious -- and this troubles me. Now I have the time to devote to honing my explanations, with help from strangers who share my curiosities.

Phoenix Arizona UFO sighting Nov 7th 2015

- Compassion4truth / **Published on Nov 8, 2015**
- I'm not the only one who saw this last night! I'm not sure if I completely believe the 'official story' released by the Navy, but I think they might be telling the truth about it being a rocket. It still leaves me questioning, because we were all told the Phoenix lights were flares when it's been proven by experts and many witnesses to be anything but flares. I posted this so you can draw your own conclusions. Thanks for watching and enjoy my other genuine UFO posts.
- Wish the video was better, but it was just a helmet cam. By the time I got my iPhone out when I stopped, it was already fading.

Phoenix Arizona UFO sighting Nov 7th 2015

0:04 / 2:37

Rocket , Comet, UFO , Nuclear Launch?? Bursting into the sky - Real Life Hyperspace!! So. California
<https://www.youtube.com/watch?v=c71F2pltREc>

- Taofang == Started off as a red streak across the sky then suddenly **bursting into a white spiral** as if shooting out to space leaving the sky lit up. There was supposedly a meteor shower tonight but unless our perspective was off, this looked like **it was going up to space , not coming down**. *blanked out a few points of audio when me and my wife went on a cursing frenzy lol Filmed in Brea, CA on 11/07/15
- =====
- Bryan Speer == I saw it when I left my house and went on a walk last night. It **made no noise**. It lasted quite a while. **Very bright**. The most odd thing about it was the **blue-ish green tail cloud it left behind** which seemed to stay for about 10 minutes. Caught a picture of it on my phone
- <https://www.youtube.com/watch?v=FyWccT3E904>

<https://www.youtube.com/watch?v=FyWccT3E904>

- j gonzalez == This started as a firework or rocket it was orange. I saw it take off like a plane it went into the sky then it. turned around n **it beamed a white light thru a lense**. moving the direction of the beam to then disperse some blue green smoke in the middle... and for EVERYONE to see it?. Coincidence?.. I can only relate that too a flat earthWHY?.. would ppl outside of california see it?.. ...This has also been reported in CHINA and FLORIDA. not too long ago. I was in Bloomington Ca. **No Missile has a beam of light** .like this one did!
- djdarena == +j gonzalez How interesting, I was wondering if someone saw the same thing like I did. I also saw it taking off somewhere from Norco/Corona area like a plane. We were driving in the car, so I couldn't take a video. My girl and I saw it. It had a kinda orange/yellow light when it took off from the ground, and at first it was flying perpendicular to 60 freeway where we were. **Then it change a direction a little bit** We saw this yellow triangle light towards us, and I really freaked out after **it released a green cloud like octopus releases an ink**. It was very scary. Then we stopped in Riverside and saw only a glowing greenish/bluish sky from it. Few people on the street went to see it, too. I am just surprised **there were no any noise**. Even planes make it,
- Kiara Jones == I have 2 videos of it on my phone from when I saw it in the car, I was freaking out when I first saw it cause I thought it was a shooting star (which I have never seen before). **It had a little light in front then a slim tail**. After about 30 seconds **it just stopped** and the tail disappeared. Then it started forming a much thicker "tail" and **started to spiral**. About 3 mins later, the only thing left of it was **a greenish blob** in the sky where the thing used to be. Should I post my videos of it on YouTube? I didn't get the beginning of it just the standing still and the spiral.

nm

- Mylisa Vallejo = that sh1t was not a missile that's for sure we saw the whole thing **it stopped for a cool minute** and kept going people at Los Alamitos saw it at 6 pm I live 20 min from Los Alamitos it doesn't take no dam "missile" 3 hours to get to where I saw it from that sh1t was something else media and government are saying it was a "missile" so people won't start to panic gtfo of here with that was a missile
- Platos Apprentice = Really? A ballistic missile test over a civilian population?? **No missile in existence produces light like this thing did** and light produced from a proportion system is not spherical. Nor would it be **so large and so bright that it can be seen from 3 different states. How dumb do they think we are**, that we'll believe any story they try and shovel down our throats?
- Madre Thompson = yall are IDIOTS. aint no damn missile ! stop bein retarded
- <https://www.youtube.com/watch?v=b6WSxHuLxFQ>

comments

- Ian Stone == I was in Woodland Hills and saw this. It looked like a missile or a plane, and the cloud was spreading the light. The only problem is that **planes do not have light like this, and missiles are not launched in this area.** The only explanation I can offer is that the light continued into the sky after passing through the cloud. So, it's a top-secret plane I don't know about, or someone else is flying around up there. I don't mean aliens, this was human whatever it was. I have filmed top secret military stuff for the Navy and I've seen a lot of stuff in the Army Special Forces, so I'm not some uneducated observer.
- <https://www.youtube.com/watch?v=lGdycl8ek88>
- “Road” == It started out what looked like a fireball **moving from south to North above Southern California.** Then exploded into a white circular glow. The light continued moving north and then the white center faded out, and a blue/green light glow remained afterwards for 5-10 minutes. This video was taken 2 hours east of San Diego, in the Anza-Borrego desert looking towards the west coast over the San Isidro mountains.
<https://www.youtube.com/watch?v=-SxBmt8kAqY>
- Pacific Vape == my son and I saw it from Catalina Island. we **saw a orb with it that turned.** My son got a pic of it.

November 7, 2015 eyewitness accounts

- Russ Tanner == At just after 6pm, I walked outside with my two little kids (3 and 7 years old) to go to the store. Out of the corner of my eye I saw a huge fireball slowly moving across the sky (it's really hard to see in the video). There was a **large, white smoke trail behind it.** After several seconds the fireball started to disappear **and a large, spiraling blue cloud/trail appeared.** The blue cloud increased in size for about 30 seconds and started to **fade.** I live in Capistrano Beach, California.
- <https://www.youtube.com/watch?v=eyXlh1Qmxio>
- Trill_Ej.415 == thats what the military says...u really believe that? A missile from the "Coast of the bay area from a submarine, **but it came from inland las vegas**"...People saw it from Mexico. **How can a missile go from Las Vegas to San Fransisco to just gone in 10 minutes?** Thats an 8 hour drip. A few hours from a jet. How is that a missile???
- <https://www.youtube.com/watch?v=NErLF1WnCYs>

More....

- Chanyyn Lowe === Well it looks like it stops..... **Do missiles stop and hover?** I don't know ?
- it's ya Boi lily == nope.. missiles don't stop until they reach their landing point! it didn't seem like a missile to me! unless the landing point was in the sky.. I live in the Fresno area close to Visalia and I seen it from there when I went out side the **blue was slowly fading away**, and as far as I could see it looked like it was moving in the sky **like circling** so I wouldn't think that was a missile
- Chris Miller == I saw it happen also in oceanside ca , and **before it paused in the air with the blue beam**, it looked like a meteor fireball first then it stopped in middle of air , **then a circle of fog formed around it and a blue beam came out** , I saw the whole thing happen
- <https://www.youtube.com/watch?v=UmdXg8ipvr4>
- Javier Rodriguez == guys I swear to God on anything I saw **this very close to me the light was powerful** and it looked like it was like cloudy wherever the light pointed and it also made a turn no way this is a commet ==
<https://www.youtube.com/watch?v=LE6DITvMT-c>

accounts

- Fahad Khan == alright this is my first post on youtube ever but for this i had to create account. I live in san diego i was just chilling on my balcony from start to finish i saw it: thanks for posting this video but i had a way better glimpse i almost s^^t my pants because i thought it was a nuclear missile. So i see this thing arching in the night sky with a smoke trail and im like ok who launched that. For a good **2 minutes it keeps traveling up and then it exploded.** So the explosion u cant see in this video but it was an blue explosion that exploded outward **in circular fashion** similar to nuclear explosion, **the dust cloud was coming towards me** so i freaked out and ran inside the house because i thought it was an nuclear missile and i didnt want to get radiated, either way i looked it up online and thought it was a Taurid meteor. After calling NBC, apparently lots of people called in with videos but i doubt anyone got the view that I did. Trully the most beautiful phenomenon i caught a video too and it is bigger in my video but i caught it after the explosion cuz i was too amazed and i freaked out. thought id tell you the nbc guy told me its a missile test off of point Magu naval station! crazy tho !
- Kale Scott == Saw it in Northern Cali by Sac it wasn't a **missile towards the end of it we saw it change Directions and go up and down** before it flew off and disappeared
- Isabel Ambrocio == I was constipated than I saw this and I was not constipated anymore. After changing my pants I tried running away but **it kept following me.** But for real, in Rosarito mexico **the blast shook my house** thought it was an earth quake but when I went outside saw this **huge blue ball** in the sky with its aurora rapidly spreading out. Then it slowly **drifted north** and faded.
- https://www.youtube.com/watch?v=NvxuYWF_8pE

The Aztec Calendar Channel ==

<https://www.youtube.com/watch?v=fsWDaocpPyl>

- I SAW THIS! It happened while I was standing out in the Chula Vista Elks lodge parking lot on that same night in 2015.
- It was weird for me how it happened, but I stumbled into the open just as this pointed bright white light seemed to **be approaching from the west** where airplanes approach. But just as it entered a "Fog Bank Ball" (which was growing) it ceased to move and merged with it.
- That's when I began to wonder, and then strangely a blueness began to engulf the Fog Ball, and the whole thing turned a **turquoise color**, which was the same color as a meteor I saw a day or two earlier.
- Indeed, that was a part of the Taurid Meteor shower that peaked on the 11-4-15. So it is a very good chance this is same event that I saw, and others were watching it in the parking lot as well; everyone was speechless.
- =====
- Meteor Over California 11/07/2015
- <https://www.youtube.com/watch?v=nuo0ovcMpRo>
- Drew Togh == I walked outside to take out the trash after waking up from a nap and saw this **weird light** in the sky. Thinking it was an airplane or helicopter **pointing its light towards our neighborhood** then I realized that it was actually a **meteor**. Excuse my awkwardness I just woke from a nap and was totally out of it haha.

Detailed flight path perceptions

- Mike VaVerka == I witnessed this event from Canyon Country, CA while sitting in the back yard around 6:00 pm. This reminds me of the Vandenberg rocket launches I used to see back in the 70s. Clearly this was not from Vandenberg, it was launched from a more southern location, **perhaps in the pacific somewhere off of San Diego or Orange County** - Maybe one of the islands. Interesting, because right now LAX airport is diverting west bound take-offs this week due to military maneuvers in the Pacific. <https://www.youtube.com/watch?v=wNU7wZV7cuo>
- Steve Quayle [:(**406**) **586** - **4842**] == I saw the whole launch, as I was walking back to my car after a walk on the beach in Carlsbad, CA and I can tell you that the launch I saw came from the south of my position. That would put it somewhere around Cardiff or Encinitas about 20 miles to the north of San Diego. **I saw it shoot straight up and then it changed direction and looked like it was heading toward Camp Pendleton.** The light was bright yellow orange and I thought it was a CHICOM cruise missile, then it looked like it changed direction again and that's when the missile staged and the light turned blue and left a green cloud in the atmosphere. It was definitely a SLBM(SUBMARINE LAUNCHED BALLISTIC MISSILE) and I have seen missile tests before and yes the second stage burns blue, the other light people were seeing was the first stage separating and the green glow is from the rest of the fuel in the first stage being spilled on into the upper atmosphere. <http://www.stevequayle.com/index.php?s=33&d=1602>

Mystery Explosion in California? Connected to Mystery light seen in the sky?

- Professor Doom1 == LAX has to divert air traffic for a week due to a secret Military maneuver project. Last night a strange light could be streaking through the skies of Southern California headed East. Now a video surfaces purporting to show **a huge explosion near the Salton Sea** which happens to be East from where the strange missile like light was seen streaking through the skies in So Cal.
- Eriamay == I live in apple valley Ca and I was standing out side having a smoke. I seen something from a distance that looked like it had flames coming from its tail end. then I started seeing the sparks then the bright light and it exploded right in front of my apartment in the sky. I was thinking it was some kind of flair at first with the sparks flying from it until it got bigger and brighter and then exploded like in the video right above my apartment complex in the sky. it didn't look like no sort of missile when it was going up and sparking. n when they said on the news its was a missile test from the ocean I am like yeah what the f**k ever I seen the whole thing **it came from inland** and since I am like 3 hours away from vegas and about 3 hours away from the ocean it made no sense of it being shot from the ocean and also for it to be seen in 5 other states, the military and government is lying . and they said that there will be multiple testing that will be seen by many well uh I haven't seen any since.
- <https://www.youtube.com/watch?v=0oQhke3g-VY>

Liz Bgood comments

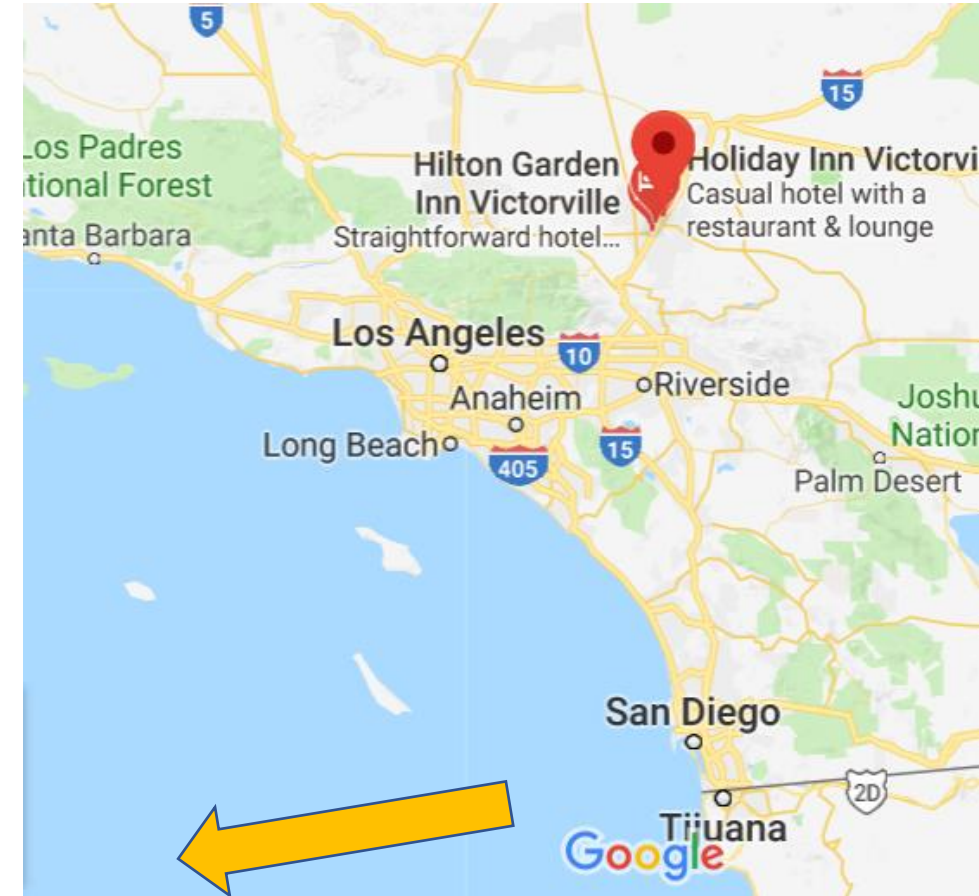

<https://www.youtube.com/watch?v=I6tZWjQNS-A>

- I saw a **yellow fire ball** traveling from the **south towards north**. I am standing by my window and noticed a yellow light coming from the south at a slow speed. It stood right above our city. (compton) and all of a sudden **stopped** and it **split** unto two bright white lights, then all of a sudden the lights expanded making **a huge circle above our city**. Then it moved towards the **north**, leaving a blue stricken light. So, this happened right before my eyes, and I know it's not of this world. The media lied and said it was Edwards Air Force, while the other News station said it was the Navy. I am not buying anything the media tells us. **A missile does not stop in the middle of traveling**, and this thing **stood still** in the air, splitting in two white lights. This is not normal, and I am starting to notice, these objects are coming from the South. So, someone or somebody is not telling us the truth. I guess it is our government.
- [to] +lars330 == You still don't get it. I saw this thing from afar and it was yellow, like the street lights, but was traveling at a slow speed. It stood still and it broke off into two white lights, **then it illuminated the sky like clockwise**. It made **a huge circle**, then it disappeared leaving a blue stricken light. If this is not a UFO, then I don't know what it could be, but I know meteors don't travel at a slow speed, and this thing **moved like the pace of flying balloons**, but steadily traveling at a slow straight line. Can meteors split in half and put on a show for people to see? And why would the military test missile over its own population? **Think man, think!!!!!!!**
- [to] +Bdizz306296 == Thanks for the information, but I am not buying it, specially when I have seen this flying object before in Riverside, and it wasn't a meteor. It literally stood still for like 5 minutes, and **then it took off at a speed that's impossible for man to recreate**. IT'S IMPOSSIBLE. No speed could be measured in the Richter scale. **You have to see with your own eyes in order for you to believe it**. Otherwise we'll be going back and forth with this conversation. Good try though.
- This is getting real strange. I saw the yellow fire ball traveling from the south towards north and it stood still over Compton. **It literally light up the city**.

Bright Light Seen in the Skies Over California (Missile)

<https://www.youtube.com/watch?v=-0AQQ1NpROs> 38,041 views

- Victor Valley News Inc. [Victorville]
- Bobbi Ashley == **Why would 2 military heli's be chasing a missile?** I wonder if that's common? I heard that over the police scanner.
- D. Kirkwo == you have to be awful dumb to believe the US navy are sending ballistic missile tests **over populated areas** in california. as usual the Military Lies about everything. also **Missiles i have seen in past do not stop or hover nor do helicopters follow them around.** first of all a Helli copter could not go as fast as a real missile. What a crock of crap.
- Justin McKey == it was **right over my neighborhood** in silver lakes ca it was really bright
- Dumitru Albu == a missile? I doubt, as a missile is not **stationary like this light is.** search for sth else.

Something over Los Angeles 11/7/2015

<https://www.youtube.com/watch?v=Mhj5QsouYFs>

Patrick McEveety ~2400 views

- There was a very bright circular burst. Through the burst came a bright central light. The video starts a little after the bright light began pushing through the circle, forming a trail or tail in its wake. A fluorescent turquoise light remained in the area of the original circle for 5-10 minutes afterward.
- =====
- Matt Organista [Nov 2015] -- I train at a gym with a guy who daughter was on a boat on the backside of the Channel Island when this missile was launched. **The missile flew over their boat and stopped.** When they took their phones out to film, **their phones were jammed** and **all the compasses on the boat started spinning.** Other fishing boats' near by reported **their radars were jammed.** I think thats why they didn't want planes flying over.... Something is going on out there. A couple months ago there was an unusual amount of helicopters flying over our beach town with these nava battle ships off the coast. Never seen anything like it before.

<https://www.youtube.com/watch?v=nKvBEpcBw2M>

UFO LA Just now Sensation unknown flying object or comet over Los Angeles // Andrey Solomatin

<https://www.youtube.com/watch?v=IkJGr8jo60k>

- mrfaty323 == I just witnessed this myself... It seemed out of this world.
- Thomas Tran == What amazed me was it was able to stop in the middle of the sky for like a minute but I may be wrong.
- Shalom Medina == we were right below it but couldn't get any video on my cheap S5
- allen hunt == a drone with a flashlight huh do you know that thing was size of a foot ball field no drone is that big
- allen hunt == that's what they want you to think a missile from a submarine that thing was a about a hundred yards long
- Uchiha Soles == I HIGHLY doubt they would be testing rockets, where would it go? why at this random time? and people are saying the noise was really weird. and how does it just stop like that?

Las Vegas Mysterious Light Nov 07 2015

<https://www.youtube.com/watch?v=T-VOESljjRM>

- Successfulzombie == Strange light(s) above a clear Las Vegas sky, video taken from the southwest side of town. **Large Beam of light** seemed to linger over the night sky. At first it seemed like **a police light from a helicopter** could be the source, but without a helicopter in sight(or sound) it appears to be caused by an unidentified source.
- Enigma Seeker == Its a rocket. The ice particles are being reflected by the sun from the edge of space. And that's coming from someone who's seen UFOs and investigates them. Sorry.
- TheAngelofnv == Sorry to burst your bubble but there was more than 1 sighted close up different parts of the Western US. A similar light appeared **directly over Mt. Charleston**. **The light source moved while the dome of light it was emanating, didn't**. then it suddenly vanished

UFO over Los Angeles 11/7/2015

- Patrick McEveety == There was **a very bright circular burst**. Through the burst came a **bright central light**. The video starts a little after the bright light began pushing through the circle, forming **a trail or tail in its wake**. A **fluorescent turquoise** light remained in the area of the original circle for 5-10 minutes afterward.
- Rick Dohner == i saw it as it first appeared in huntington beach. i heard a chopper, figured when i looked up it was his spot light. but then i realized the chopper was much lower and heading towards me with only standard running lights. this was at a much higher altitude and moving away from me. **the light was pointing not in the direction the object was moving**. as it moved away the vapor trail was as roy butcher said, kind of blueish green. and it lingered for quite some time. very impressive.
- Junior Compton == Everyone in the pier started running cuz **it light up the whole sky** and we didnt see what shot it down but we heard a **wierd sound** and the thing desinegrated and one ufo kept moving but it changed direction without the light and not bright enough for the pictures i took or the video
- K Avi == I was on Jefferson blvd. omg we saw the whole thing! It looked like **a fireball with trail left behind it**. Going up slowly slowly **suddenly it turned into a bright white ball**. It moved so fast suddenly it started **flashing at one detection a very bright light**. I've never seen a light so bright light that one. The. On the opposite end from where it was flashing a green light so bright appeared. It was between 6:08 pm or 6:15 pm The light came off and the white ball was so clear it went up up up in the sky almost as if it was going into space. **It just went straight up**. It was so clear still at the longest far distance up in the sky. We suddenly could still see it but it blended with the stars. The green light was left behind it would not banish. A a matter of fact a plane crossed by when the white light flashed lol Scary and interesting

Jeremy Perez -- Trident Launch - Twilight Effect

<https://www.youtube.com/watch?v=NnpVJKdvsa8>

© 2015

Jeremy Perez

perezmedia.com

0:04 / 0:15

Flagstaff, Arizona

- **Published on Nov 8, 2015**
- A Trident II (D5) missile test lights up the sky over the western US (as seen from Flagstaff, Arizona)—7 November 2015. The exhaust from the launch expands quickly when the vehicle rises above the denser portions of the atmosphere. If the launch takes place shortly after sunset when viewing toward the west, it can lead to brilliant displays such as this large, circular halo. A more concentrated stream of fuel/exhaust glows as a streak of blue-green while the missile itself continues to spew exhaust as a more white-ish fan toward the right side of the halo.
- I was kind of amazed that I coincidentally stepped outside when I did to actually catch it in progress.
- It's pretty crazy how far away those are visible. It's the second I've seen from Vandenberg or near Vandenberg.

Arizona sightings

- ashley simone = ..i was traveling through the mountains headed to Phx with my family when we came upon this "glow".. this freaked us out because it went from a uneventful ride to a **big bright circular glow expanding bigger and bigger.. glow was on the ground we drove through**.. in no way was this a missile launch from over 1,000 miles away.. i told my s/o several times to turn around.. that i did not want to drive thru **"fog that glows"** - i have been trying to find an explanation as to what this was.. not to mention we saw multiple shooting stars back to back once out of the glow.. ((idk if this has anything to do with the glow)).. this was a circular shaped glowing fog on the ground in the mountains.. this was seen in several states because it happened in several states..
- Hana = When I was passing through flagstaff to phoenix on the 7th of November, I saw the exact same thing. It looked like a **lighthouse in the sky**, without a base, and then slowly dissappeared. This is so bizarre.
- <https://www.youtube.com/watch?v=D-3lIdaUf2rw>

Detailed eyewitness responses...

- DIY Tesla PowerWall ==1. Video shows the object as a bright light with no tail. Then, a tail forms. Then there is **a Mach 1 signature event**, then **spectacular glowing** / changing colors. **Logic** suggests this is an object **entering the atmosphere**, slowing down to Mach 1 (where the pressure waves catch up), then burning up.
- 2. This was witnessed and filmed from California to Idaho to Mexico. A small object cannot be seen 3 states away. it **MUST be a large object**. A missile **cannot** be launched in the Pacific and be **visually bigger in Vegas than California**.
- 3. The U.S military **does not** test nuclear weapons over populated areas, announce to the media, or conduct a test at a time that will yield maximum spectatorship.
- 4. The footage **looks nothing like any previous night launch**.
- 5. Where's the footage of the launch?
- 6. Why is the flight path **over land** instead of out to sea? 7. Why **risk collision** with aviation?
- North Star = DIY Tesla PowerWall I saw this too in Phoenix, AZ and thought how wi[er]d this is! and no it wasn't a missile, **it was just stationary, not moving at all**. I guess missiles are supposed to move at breakneck speed. I only believe this because **I saw it myself!**
- Alexis Cardenas = i saw this with my girlfriend and cousin at Estrella parkway in Arizona. it looked like a moon at first, open up with two bright lights had blueish mist surrounding it and a green been was **on the mountain on the left of us**. this was not a missile. we **ran** when we seen **it was getting closer to us** and the blueish mist was expanding doubling it's size when we first seen it. most craziest thing I've seen in 20 years of living. definitely something strange is going on. we need to wake up.

UFODI: 2 UFO's Involved In California Trident Missile Explosion

7th/Nov/2015 == 6,757 views

<https://www.youtube.com/watch?v=MUf8Xi65C4w>

- UFODI == UFO passes trident missile fired from US coastline by the US military and seems to have destroyed it, whats strange is the huge brightness of the missile blast illuminates another unidentified flying object.
- macpduff == It looks like the missile was sent up to intercept and destroy the other object. We're told it was a test, but night is a strange time for such a test. It may have been a real event and that's why the Trident missile was sent up - even though it would scare the cr*p out of the public.
- Xterminate13 == shared this on facebook. everyone's all over it. not the first time this happened
- Yadira Espinoza == I believe they just wanna cover up, by saying it was missile...
- Donnabis == that's not what I saw. the glowie stuff you see is the fuel exhaust being lit up by the sun (because it is very high in the sky at that point, in the atmosphere actually). the "explosion" you see, is one of the stages being detached. and when they detach, they tend to come off with a small explosion. which disperses some of the exhaust in a halo around it. and if you had picked a longer or even A HIGH DEF VIDEO!!! you would have seen that it keeps going, with one more stage release. and then it dies out. at this point it would have deployed its payload, but seeing how this was a test fire, there was none.

California Ballistic Missile (ufo) Explodes Vaporizes after its Blasted by UFO == 9,011 views

<https://www.youtube.com/watch?v=-MyBnQVnTNk>

- Mike Tedesco == California Meteor Explodes after its Blasted by UFO, followed by 2nd ufo at upper left at 20 second mark.... so if it was a ballistic missile, and they cleared the area,... wtf is with all the planes/ufos/orbs in the area, huh
- Virginia Shaubel == I like how it slowed down and hovered then picked up speed again, tridents go Mach24(Approximately 18,030 mph (29,020 km/h) And people think they would test near a heavily populated area. It made no sound on any of the vids I saw. Also there were planes flying in some of the other vids. Great vid. Makes one ponder ... Thank you :)
-

Another 'search light' metaphor

- Your reflection [Sep 2017] == I saw this ufo first hand. The **white light** it emitted seemed like **a search light** at first, **it shined down directly on me and my family**. I remember seeing **the main white light zoom off** after the blue discharge. Videos of night/day trident2 missile launches look **nothing like this**. Also, what are the **tiny, flashing lights** that surround this?? uhhh i wish Julian would have kept filming the ufo with a tripod, this is the clearest footage of it. You can see **it keeps hovering after the blue discharge**, its the white light in front of the cloud. I remember seeing that light speed off into the distance and up into space.
- <https://www.youtube.com/watch?v=yu7mNmqqJJ10&lc=z13nsjgwwzyjx1m03222yn0roxapul2sd.1511587268779805>

Why Oberg's report is wrong

- dionyz1 [nov 2016] == That PDF doesn't show anything, but what they believe. **It's dark. Not slightly dark where sunlight can hit the rocket. It's midnight dark.** The fact of the matter is that the government wouldn't be testing missiles **over a highly crowded population**
- Will Pack -- You are the one who is too dumb to understand what is in the PDF. Keep on dreaming about your precious aliens.
- Tyler DiDay == Will Pack shut your stupid mouth it's not a missile, stop trolling all these comments.
- <https://www.youtube.com/watch?v=yu7mNmqqJJ10&lc=z13nsjgwwzyjx1m03222yn0roxapul2sd.1511587268779805>

COULD IT BE SUNLIT??

- Styx85 == it's that bright because **it's high enough up** that the missile's exhaust gases are **lit up by the sun**.
- Louis Kirkwood == at night time **when the sun is on the opposite side of earth** yeah ok
- Styx85 == Louis, it wasn't in the middle of the night. I believe it was around 6 PM, just **an hour or so after sunset**. Early enough that a missile 300 miles up **can still catch some rays**.
- Louis Kirkwood == well that's **plausible** but the explanation of it being a missile still doesn't add up to me. why 'test' a missile in plain view of the entire population of LA? these things **are normally done in secret** and **over the ocean** where nobody can see.

INSISTING IT COULDN'T BE SUNLIT

- 5.7GREGG == it was about 8-9pm when it happened. witnessed it with my own eyes. so theres **no ways it caught any sun rays** plus **the sun set on the opposite side** of where this happened.
- Styx85 == I think you're misremembering, Crystal. You can check the metadata on this video, it was uploaded at 7:47 PM local time on the day it happened. I don't know how soon they uploaded the video after the event occurred, but it's fair to assume a little time had passed before they got down to the apartment, shot the intro and uploaded the video. And no, the sun didn't set on the opposite side of where it happened. It was visible over the ocean, **west of LA. That's where the sun sets.**
- 5.7GREGG == well you go ahead and go **based off what "data" says**. I clearly **seen it with my own eyes and do not need "data"** on this one. If you seen it in person you'd understand. But either way at 7:47 how is the missile going to catch sun rays? **Sun sets before that** anyways
- Styx85 == The video was uploaded at 6:47; it happened just after 6 PM. About an hour after sunset in LA. Then consider the fact that it's hundreds of miles away due west (towards the sun) and hundreds of miles up, it should be pretty clear that **it could still catch sun rays** even though **it's dark where this was filmed.**

Purcali [Nov 7, 2015]: West Coast light in sky emits Bright light leaves green glow like northern lights - UFO?

<https://www.youtube.com/watch?v=AMDxtbWDsTM&lc=z23qwjszpl2jdb1xx04t1aokgbtdi03k1zlegtwdsczrk0h00410.1522784582549808>

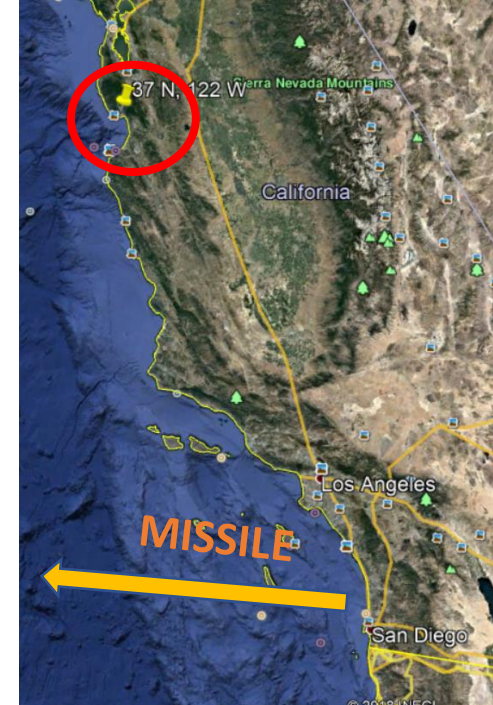

Shooting light in sky That explodes into a light that **grows to cover the entire sky** and **stalls** leaving a green glow like the northern lights that didn't dissipate for more than 10 minutes. UFO?

I saw what looked like a shooting star (only traveling very slowly) coming from South to North in the Western sky over the ocean in San Diego. In front of the light there appeared to be an explosion like a firework and it left a very bright trail like a meteor and that's when I got my camera phone out and started taping. After the white tail had gone it looked more like a star in the sky but moving very quickly from South to North on the Western Skyline. In the video when the bright light begins to dissipate you can see what looks like a star again not moving across the sky but it appears to get smaller but never really disappears. A lot of what I could see with my eyes did not get picked up by the camera.

Ronjamestrader -- object came **from southeast to northwest**, directly **overhead** at 37x122 north by west. Impossible if it were a small missile fired from a sub. It was travelling very slowly without making any sound. Skywatcher here, I know what I saw, the submarine would have had to have been in the gulf of Nevada. You're saying I could see a plane take off from lax from sfo??

<https://www.youtube.com/watch?v=amC5aS1FWYc>

37x122

GAME CHANGER! UFO Sightings DARPA DAMAGE CONTROL!! THIS IS BIG-TIME! 2015 // 280k views // [thirdphaseofmoon](https://www.youtube.com/watch?v=amC5aS1FWYc) // Published on Nov 8, 2015
<https://www.youtube.com/watch?v=amC5aS1FWYc>

Nicholas Martinez == my name is Nick I am a security officer for USC and I remember this day it was USC's last home game I remember seeing a light that **resembled a commercial airplanes high beams** but it had a translucent light that kinda resembles a **helicopter spotlight** but it was we[a]k and he was facing the stadium while the object was still flying towards me parallel to Vermont Boulevard and then it did it supertonic blast but the UFO did it 3 times

Jerry Wright == I WAS IN TUCSON AZ! MY son saw it come down from the sky we were going direct west bound **came directly above us** I was near West Pecos way and Lambert in Tucson AZ. I pulled over on West Pecos ways I was in a desert area **it lit up the Night Desert like as if the Moon was out but still brighter** my son first noticed it, "Dad look the moon is getting bigger" I shrugged it off (he is 6 year old) then he repeated what he said! IT got my attention because **the desert was lighting up**. I followed it a bit going west bound! it started IN Tucson then I watched it go West North WEST!! Going to LA San Diego Direction! IT WAS NOT A MISSILE OR ROCKET I AM A US NAVY PHOTOGRAPHER , I HAVE Photographed Missile Shoots, rockets and this was no Missile! IT WAS A BRIGHT WHITE ORB made no sound! Had no CHEM trail. it **slowed down then moved rapid north west** direction. IT scared my kids I and 3 other Cars pulled over to watch the object move West northwest directions. Watch it at 7:05 - 7:17 until it went into the horizon.

<https://www.youtube.com/watch?v=Mhj5QsouYFs>

- Rhythm Sections === I watched the entire thing from Sacramento. It looked like a light shining down on earth. Then went off and did its big blue and green poof. The reasons I feel it was man made are, the rocket was visibly glowing, **I could hear the thrusters in the beginning**, it never did anything erratic other than the initial **"hovering"**, and the light show of green and blue. you could see an explosion when it was rea[ch]ing the edge of the atmosphere. the clouds were very obvious even with the naked eye. I believe it was a multi stage rocket. a blank trident maybe. It went straight to the stars, not at light speed, and didn't make any left to rights. And I believe that life exists in far off places. had I not experienced this for myself I'd believe it was extraterrestrial.
- Jozey (JozeyMusic @ SoundCloud) == I don't understand how people are still saying "this is a missile/titan launch" when there are clearly sightings in places where these things can't be launched... ---> LOGIC <---
- godsson711 == I saw this in Vegas it was so bright and looked very close I thought it was over Mc Caron airport and it did look like it disappeared in to a portal in my opinion fuk the government tell the truth already
- Nan Sherrill Smith == What kind of missile **stops temporarily and then makes a course correction 90 degrees**

Meteor? Rocket? UFO? Or something else? 11-7-15 [HD]

Russ Tanner [Nov 7, 2015] // <https://www.youtube.com/watch?v=WftnuMaAARo>

I was just about to get in the car with my two little kids when I saw **a large fireball moving across the sky** (I was in awe and was yelling at my 6 year old son to get out of the car to see it). There was **a long smoke trail behind** it, although it's hard to see in the video. The fireball faded and **a large, blue spiraling trail/cloud** appeared. Crazy! It looked very similar to the "Norwegian Spiral Anomaly" from 2009. I live in Capistrano Beach, California. My sister also saw it in Carlsbad, California.

Tim Horton == I filmed it too; you had a much better reaction though. I freaked out and thought that China was firing missiles at us. Oh well.

Fer Lugo == Did you see **a tornado like whirl being emitted from the very tip of the cone shaped light**? Im about 70 miles east of Los Angeles it was very very clear here. The **white/orange like light** looked like **2 huge spot lights** it was amazing.

Tim Horton == I filmed it and **It looked like the magnetic field lines of the earth**, like what you see in textbooks and whatnot. I looked like a **orange comet** at first and then blew up like a balloon filled with dry ice. Just describing my view...

Fer Lugo == I immediately started recording, only a really high powered camera though would pick up detail that I saw. if you look really closely on the this and the many videos our there **on the right side or tip of the cone shape bright light you can see a very small spinning whirl**

<https://www.youtube.com/watch?v=amC5aS1FWYc>

- inicio Acosta == What many people don't mention or maybe are not aware is that there was **a second objet flying right next to the main light**, so if it was a missile, something was following at that same speed. Then this happened **I had my binoculars with me** so I was able to see the other objet **blinking** next to it, I manage to capture a photo with my phone where it shows the second objet.
- saturdyl == Me and a friend were walking in Lake Elsinore and around 6 o clock we saw this huge light just flying in the sky and it was **pulsating**. It left a **huge blue cloud of gas** that was glowing for about 20 minutes. The light that was pulsating blew **a huge cloud of gas out of it that covered the night sky** but it was too dark to catch on camera. The light then **floated a little downwards** and kept blowing out a gas or something **out the bottom**.
- thehalfnavajo == **It did stop**, I was watching it from a hotel across from Disneyland. I told my wife this doesn't look good and maybe we should get inside. That **light was very very bright** and I felt a **strange energy** while watching it.

BREAKING NEWS BLUE BRIGHT LIGHT SPOTTED UFO MISSILE TEST OVER LOS ANGELES CALIFORNIA 11/7/2015 31,366 views <https://www.youtube.com/watch?v=TA171ssAOLs>

- Rudy K == It was definitely a UFO as the light was bright from my stand point there was **a shape of a round sphere behind the light** as the light started to fade you can then see the object as star moving pretty fast then **it suddenly disappeared** it did not blow up nothing. Explain that!
- Jihad Waller == My thing is, if it was a so called missile why did it **expand then disappear** ? Then seen in other states ? it would have blew up or demolished then stopped! Not stop then recreate it self .
- Gio 92 == a cover up...i seen the light as if **it was still and it wasnt moving like a missile** i believe is a cover up.
- Jarrett Lewis == i saw it over Pasadena. but the part that got me was as i was getting my phone out **this mist or cloud covered it but i still could s[ome]what see the light**
- Antbank\$\$ == I seen it start moving very slow started out as the color red suddenly stopped for a brief moment then turned bright blue with **swirls of light** all around it and to leave the sky with a big sphere and then to **suddenly vanish into thin air** missile test my ass

COMET or UFO!? 105,384 views

<https://www.youtube.com/watch?v=krhoij9sars>

- Michael Ziegler == It looks like it **opens a portal** in the end to go back from where it came in the universe, **a wormhole** that it can just fly through to get back to the home planet. Which is the most fascinating thing about it.
- jim oberg == Uh, just HOW do YOU know what such a portal **'looks like'**?
- Michael == How do YOU know it's **not** a portal? **What else could it be?** How you do know what a portal would look like if an advanced civilization truly had one? It could look like a portal, or it could look like something more complicated just just a door than opens and closes.
- jim oberg == This one did a **VERY good imitation** of a twilight missile launch, which is odd, because the launch was pre-warned by notices to ships and planes, want to see that message?
- Michael == A missile **staying in the middle of the air, shining a bright light** in the dark sky, then a blue cloud **exploding behind it**. It flies **into the blue cloud**, then the blue dust continues to **ignite** behind it. Before it all **just disappears**. *It does not sound anything like a missile, or look like one from the videos I have seen.*

<https://www.youtube.com/watch?v=OJYAuJZM89U>

- soundxcrash === if it was a missile explain **why there wasn't any noise??** even a failed missile would caused some noise people said and even the people I know **that were near or a not farther away** from it said there was no noise
- Glenn Cameron == I grew up near Cape Canaveral and saw lots of rocket launches. I remember seeing the exhaust plumes but I don't recall seeing them **glow**.
- ThatGuyFromWalmart Sexy == It's not a missile, if it was a missile it wouldn't be visible through all of California especially since it was "launched in point mugu" and why would that happen to a missile... I saw this before it turned to where the video starts and **it was a thick red plane or something else in the shape of a rhombus**, there was also a trio of helicopters over LA right after this so yea that's all I'm saying
-

https://www.youtube.com/watch?v=cc0_wZat4nl&t=239s

- Douken == What high altitude? I saw it with my own eyes and **that thing was at 30,000 ft or less** I would say 20k
- MsEnlightened1 [Las Vegas] == And **it was so close to me i thought i was the only one seeing it-** and not too far after did the police helicopters show up
- dynamicvideoonline == I personally witnessed this in the Modesto Area Last night. I still feel traumatized. LOL Trust me I was like "what the f is that" It was really weird. My account was that I saw a very bright light, **then the beam of light from it**, then the **conical light** that followed. It was creepy and cool...
- sageizm == this is what my family saw, the ending part of the film in northeast Arizona. the first explosion of light wasn't the awesome part, it was the **hour glass light show** that happened after. and this was observed here in Arizona 640 miles away.
- Ajay Cero == **slowest missile i've ever seen** it would have disappeared from view completely after maybe 20 seconds. Missiles generally travel all the way up to about 60-70,000 feet. **You wouldn't see any exhaust from up there, nor a bright light**, at all. If it was a missile test they would have **shot it nearly straight up** into the upper atmosphere, which they could have done, but it would have disappeared from sight quickly. Missiles travel about 18,000 mph or faster. That thing is **taking its sweet little time to reach 60-70,000 feet.**
- Marciano Marciano == it wasn't a missile, this object came from space stopped and it launched , **i saw everything**, from the time this object entered into the atmosphere, not even the government knows how this happened, missiles, do not stop in mid air, and launched, most people saw the 2nd part of all of this, wakeup guys , we not alone.

https://www.youtube.com/watch?v=cc0_wZat4nI&t=239s

- Danny Abaldo == I do not believe in UFO's I have been looking in the Mojave desert over 5 years nothing, last night my 31 year old daughter and wife were walking to the store, we are in Yermo Ca. My daughter came in freaking out and she said, it was a bright blue circle with something flying **and something flew through the circle**, now tests yes, but all are saying it was from the ocean, so it would have been **flying towards Vegas** off the 1-15, **it was direct over head** and **very close** to them, it lasted 20 min approx, now it was flying the other way towards L.A. so wrong direction, and huge now I see it all over, man I wish I could have seen it no matter what it was.
- Q == so it was flying east to west? west bound? from mainland?
- In my area yes, from inland not coast. Later after talking to others and locals that saw it and know the desert better then me, said it was from 29 palms military base headed towards coast, also it could be the object was so big it looked as if over head to Mojave, S.D. L.A. Nevada? it would **need to be huge** it could be that, same exact footage- this is is what was seen.?
- James Caouette == It changes it's rate of movement from Riverside California it looked a little different and looked like **it made a 90 degree turn** and flew towards the atmosphere after flying alongside the atmosphere

<https://www.youtube.com/watch?v=UmdXg8ipvr4>

- MAGNUM TI TARGETED INDIVIDUAL == I saw it happen also in oceanside ca , and before **it paused in the air** with the blue beam , it looked like a meteor fireball first then it stopped in middle of air , **then a circle of fog formed** around it and a blue beam came out , I saw the whole thing happen
- Medical Conditions Displayedd == All the kids in the apartment complex were yelling about something outside that night. My daughter came in the house hysterically describing something strange in the sky. She said **it was bright with an aqua glow and that it dispersed in opposite directions**. By the time I saw it , it looked like it did in the end of your video. I was in San Jacinto ,Ca looking SouthWest
- Mr. Kitty == **I was right below the same thing** on the same night, only it was in Santa Barbara AND THE LIGHT WAS GLOWING GREEN. People were pulling over and getting out to see it on the 101.
- 2spooki4me == I like how the government covers this up by saying it's a "missile" **Like we are stupid enough to believe that sh1t**

Liz Bgood at <https://www.youtube.com/watch?v=I6tZWjQNS-A>

I saw a yellow fire ball traveling **from the south towards north**. I am standing by my window and noticed a yellow light coming from the south at a slow speed. It stood **right above our city**. (compton) and all of a sudden **stopped and it split unto two bright white lights, then all of a sudden the lights expanded making a huge circle above our city**. ... it illuminated the sky like clockwise.... It literally light up the city.

Then it moved towards the north, leaving a blue stricken light. So, this happened right before my eyes, and I know it's not of this world. **A missile does not stop in the middle of traveling, and this thing stood still in the air**, splitting in two white lights. This is not normal, ...

They can sell all the bull crap through the media, **but not everyone can be easily fooled**. The media lied and said it was Edwards Air Force, then later they said it was the Navy. Somebody jumped too quickly to broadcast the news, not realizing this happened around other places in the world. Damm, are we the only one who can see what's happening? or people are blinded and can't see past their nose.

If this is not a UFO, then I don't know what it could be, but I know meteors don't travel at a slow speed, **and this thing moved like the pace of flying balloons**, but steadily **traveling at a slow straight line**. Why would the military test missile over it's own population and people? Think man, think!!!!!!!

It literally stood still for like 5 minutes, and then it took off at a speed that's impossible for man to recreate. IT'S IMPOSSIBLE.

Something over Los Angeles 11/7/2015 // Patrick McEveety [Nov 7, 2015]

There was a very bright circular burst. Through the burst came a bright central light. The video starts a little after the bright light began pushing through the circle, forming a trail or tail in its wake. A fluorescent turquoise light remained in the area of the original circle for 5-10 minutes afterward.

K Avi == I was on Jefferson blvd. omg we saw the whole thing!

It looked like a fireball with trail left behind it. Going up slowly slowly suddenly it turned into a bright white ball. It moved so fast suddenly it started flashing at one d[ir]ection a very bright light. **I've never seen a light so bright light that one.** The. On the opposite end from where it was flashing a green light so bright appeared. It was between 6:08 pm or 6:15 pm

The light came off and the white ball was so clear it went up up up in the sky almost as if it was going into space. It just went straight up. It was so clear still at the longest far distance up in the sky. We suddenly could still see it but it blended with the stars. The green light was left behind it would not banish. A[nd] a matter of fact a plane crossed by when the white light flashed lol Scary and interesting

Rick Dohner == i saw it as it first appeared in huntington beach. i heard a chopper, figured when i looked up it was his **spot light**. but then i realized the chopper was much lower and heading towards me with only standard running lights. this was at a much higher altitude and moving away from me. **the light was pointing not in the direction the object was moving**. .as it moved away the vapor trail was as roy butcher said, kind of blueish green. and it lingered for quite some time. very impressive. lets see what kind of official description we get over the next 24 from news media and military. it will be a few different versions of blah blah im sure.

<https://www.youtube.com/watch?v=Mhj5QsouYFs>

UFO over LA 11-6-15 -- Light in the Sky - Possibly a Spaceship/rocket over LA

Jennifer Borobia == At first, the light looked like a plane. It started out as **a small red light**, traveling upward, with a small tail. The tail trailing behind the light became longer and it began to look more like a comet. I began to think it was a plane with a blown out engine, so I began to record it. **The small red light suddenly bursted into a big white ball of light**. I noticed there was a small bright ball of white light that was at the head of the light. You can't see it on this video, but I have a part 2 where you can see at about 10 seconds (maybe a little before) that **a small white piece breaks off and speeds away** from the rest of the big white circle. It was a pretty crazy thing to witness. If anyone knows what it is please comment.

Jess Moon == This is no comet, spaceship, missile. It's something more, I saw the whole thing and no comet flies upward, **no missile goes that slow and then explodes like a nebula** as well as a spaceship. I saw helicopters before this happened and they were black (cia helicopters)

Armando Rodriguez == what i dont understand is **the ring of white light** around it

mmjamora == My husband and son saw this exact same thing tonight driving through Farmington, California east of Stockton, Ca. They said it left a blue mist in the air after continuing upwards. At first it looked like a helicopter **shining it's light down**, but then it started going upwards.

https://www.youtube.com/watch?v=_mwW2oF9YcQ

<http://www.ufosightingsdaily.com/2015/11/massive-blue-ufo-over-los-angeles-and.html>

Sybil Roberts November 9, 2015 at 11:20 AM == This was not just one UFO there were multiple UFOs that were seen in Sacramento, San Francisco, San Jose , Los Angeles , Arizona, Nevada , and Utah . My son and his friend were playing at the park and **a circular UFO object hovered over the kids and shined a blue light on them** for five minutes my they were trying to look at the object however **they're eyes were burning badly** the adults supervision at the park ran to them because they said it looked like the UFO **was trying to beam them up** it went **from tree level and shot straight into the sky in one second** this was hyperspeed the object continued to **zip back and forth next to the stars** after

Sybil Roberts November 9, 2015 at 3:06 PM == About 20 min ago while I was outside smoking a blue circle the size and shape of a basketball came down fast though the ground in the same spot the UFO hovered over the kids Nothing on the ground I'm wondering has a portal been opened ?? Is there someone to report this too?

Steven Evers November 9, 2015 at 3:14 PM == I seen it too, I thought it was a **plane shining its bright light through the hazy sky** I thought, it was incredible, I was able to get a pic but not enough time to video

- **Danisha Lane** [November 10, 2015 at 12:21 AM] == wow that is definitely **something the government does not want us to see** but it is so out of their hands were the UFOs just come when they don't even know it so the government has to make up a lie **like we're idiots** and pretend it's something that its not clearly that is something from another world what it is I don't know but very curious to find out everyone be safe we're getting way too many sightings and is like the UFOs are coming here frequently so we need to be careful and be prepared for whatever there going to do
- **Unknown** [November 10, 2015 at 1:52 AM] == Navy misle testing my ass!! I burn inside wishing we could all know what is so hidden from us. But honestly the world would go crazy if we knew the truth. **Too many small minded crazies in the world to wrap there mind around something so OUT OF THIS WORLD.** At 2 minutes of flight, a Trident missile travels at 13,600 mph! There is no way anyone would have captured these videos with **it moving that fast.**
- **Angel Ruiz** [November 13, 2015 at 9:54 AM] == It was not a missile it was a ufo ,**how can a missile stop and then turn and speed up** to space it's crazy

Joco Mihić == <https://www.youtube.com/watch?v=FUiW4oBKym8>

I am truck driver and I saw this when i was passing Paragonah, UT, over I-15 at same date 11.07.2015 at 7:15 PM i know right time/date and location cause i took screenshot on my phone of that location, i was about to search is there is any launch rocket station or airport and I found out that is small town in middle of nowhere in Utah, and there is only small town few miles away with very small airport but lights this big couldn't be installed on even biggest passenger airplanes...

I stop on rest area on highway and i was keep looking in that, i notice there is lot of cars even on shoulder on highway watching that. Never saw anything powerfull and that fast in my life... I personally don't trust in aliens, even if they exist I don't trust that they coming to visit us but whatever it is, it scares me to death cause don't look natural at all!!!

And this footage is exactly what i saw but on all those videos that object is in motion and little bit far away, in my case that object was floating **on sky mile or two over ground for 2-3 minutes on same spot without any moving and then it start moving extremely fast leaving that blue cloud,**

And only thing that confuse me is why i didn't hear any sound except traffic on highway, **that was very close if that was some regular rocket i gonna defiantly hear lot of noise**, i was feeling same like somebody hit mute button on remote...

p.s. i am glad that i found this video cause i can prove my wife that i am not crazy and what i was explain her that night, also she can found on her message history than this video is posted day later our talk about that...

<https://www.youtube.com/watch?v=UmdXg8ipvr4>

- i live in NY but just so happened to be in el cajone CA just outside san diego on this particular night. i saw this happen first hand.
- it started as a small bright light, similar to a star, moving at high speeds **making impossible maneuvers. After it had reached a certain altitude it stopped, hovering, perfectly still and silent.**
- it started pointing a ridiculously **powerful spot light** like it was looking for something. it reminded me of the damn eye of Mordor, it was so bright and moved so swiftly, sometimes focusing on things miles away.
- After it looked around for a while it apparently went into hyper space because it seemed to **teleport away instantly leaving an eerie blue glowing ball of (gas?) in its place.** the person who recorded this is right the ball was slowly getting bigger and more transparent over time, what you see in the video is the aftermath of its "teleportation."
- I know what i saw and there's no way it was a fuc4ing missile. If any of you also witnessed this please let me know what you saw from your perspective.

observations

- Lavish Glock [Published on May 16, 2016] == November 7 2015 i had just pulled in to my drive way and see this thing. Even my kids (5 year old) saw it and were like wtf.. This thing had no beggin[in]g to it, **it just spawned** I would say and faded out. After it disappeared it had left **a green trail** that lingered for at least 15 minutes. It was **sphere shaped and spinning**..
- https://www.youtube.com/watch?v=Oivm0X_nJ2Q
- Douken == I saw that thing, it came, did what you saw in the video, left a glow in the sky, sort of when you see the Auroras Greenish glow, kind of like it charged the ionosphere with ions, **the glow was like a milky cloud in cone shape**. And that thing kept going straight for what it seem to be 250 miles or more, straight. Not straight like airplanes, but straight straight. Then in about (IMO) 100 miles more it did the same glow but white, but I saw **a vertical up and down glow**, then another 80-100 miles more I saw it did the same but at a 45 degree angle and 225 degrees. Never seen anything like it.
- <https://www.youtube.com/watch?v=ZPL7mMPT9rU>
- Will Fisher == This video is exactly how we saw it in Orange County CA. Most unbelievable thing I ever saw in my life.... I will never be convinced that this was man made, Man is not capable of producing enough energy **to create a light that can be seen this bright for thousands of miles**... not to mention no one is talking about the part where seemed to explode a giant ball of gas which must have been hundreds of miles across.... or what about the blue light that stayed in the sky for 5 minutes....or what about the part at the end where **the object stopped and shined a light down** for 60 seconds?? Unexplainable
- <https://www.youtube.com/watch?v=EJX3B1U2yzs>

Missile / meteor explosion over California coast

- Angelo Soto == I saw this and live in Lancaster ca, it was no missile, missiles **dont stop and hover and go again**. Plus thier was **no noise or sound**, it was like **300 feet off the ground**. This was no missile, thier just trying to cover the truth, they wouldnt test a missile over a city, damn bs man.
- Vicarious Icarus == A friend of mine called me from Anza Borrego dessert while this was happening. It was huge.... My friend said it was **30 degrees across** as seen from Anza Borrego Desert where they were doing an **astronomy weekend so it was pitch dark**.
- TheRealDjSilk == I seen this backstage at a concert yesterday woke up this morning on the news they said it was a missile test. i thought about it then **thought i seen this thing stop turn around it had a light at the tip**? since when did missiles **stop turn around and needs headlights to see**. then it made its own green cloud turn around and **went the other way** also they said it was 12 football filed lengths seen from cali to arizona. also where was the parachutes where did it land? it was more than this video from our view we seen this circle open up and it disappeared?
- bonesmasher146 == There was so much that camera's couldn't pick up. There was more than just that light. A second light chasing it, and **a third light that shot down from under it**, moments before that **spot light** came on. And **it was a spotlight**, because It moved around. **Shined down on me and my friends** at the end of our hike. There was so much more to it.

Nov 7 2015 West Coast UFO near Grand Canyon

<https://www.youtube.com/watch?v=8ibgGTiXJOg>

Penny Marketing [Published on Jul 3, 2016] == Around 9pm on Nov 7, I was driving down a 60 miles road out in the desert headed towards Peach Springs. I was leaving the trail head at the Grand Canyon that leads down to Havasu Falls. On this road, there are **no lights**, no stop signs, no speed radars, no people, no rest stops. Just Desert. All of a sudden I saw **a spotlight like light** in the sky that seemed as though it was searching for something. At one point, **the light seemed to shine down on me**, so I stopped my car and turned my lights off. I wasn't sure if I wanted it to see me. It then appeared to be expanding its light out, which I eventually realized, it was to create a sphere like orb. appearing to be working with a **Inside the orb was a blue beam of light coming from one side** green light from the other side. Almost like a machine. After it created the orb, **a SQUID-LIKE shape** came from around the back side of the sphere to the side. The squid like shape went tentacle first into the orb horizontally. once inside the orb, the squid like shape turned vertical and began to transcend all the way down to the ground inside the orb. Once it hit the ground, the orb and lights looked to be evaporating. It left a blue like hugh in the sky. That night, I witnessed something that made me realize that there is something bigger than us out there. ...

The next day, the San Diego Navy claimed that it was a missile they had launched and hadn't planned for it to be so bright that everyone on the west coast could see it. I then learned that the government **could not come up with a better cover up story** than that.

lwlScorpio [Apr 2017] == We saw this too driving out of the Grand Canyon around 8:50 PM , i kept dismissing the inquiries of my co passengers about what this bright light could be since they were new to the US and I was at the wheel. As their inquiries could not be dismissed I turned my head right to see the most fantastic sight, **a concentrated beam of very bright light surrounded by an illuminated gaseous mass that kept growing bigger** ... i kept magnifying the map on my GPS to find where exactly we were, but it was marked green with no sign of any roads near by the source of light.

“Journey Trials and Joy” / <https://www.youtube.com/watch?v=rvMgcHsll1A>

Ok for people who believe the military statement, that this was a rocket. One, all the sources from the news media doesn't flow with each other. People where seeing **red and blue and green lights behind the object**. Two, the navy said it doing drills, over Pacific Ocean, but then launches a rocket **towards the main land**? Three, what rocket **doesn't make a sound**? People who recorded this thing said it made no sound. Has anyone seen the launch video? Four why is **NASA now saying** people well it's meteor a shower and people are just recording that?

- Kale Scott == Saw it in Northern Cali by Sac it wasn't a missile towards the end of it we saw it **change Directions and go up and down** before it flew off and disappeared
- https://www.youtube.com/watch?v=NvxuYWF_8pE

Zack attack == was walking thru san clemente state park when my gf and i saw this light display. standing there mind boggled, two guys come flying on skateboards freaking out saying they just saw that thing **shoot out of the ocean**. seemed **like we were directly under it** and did not look like any missile ive ever seen, considering **it just hungout in the sky for awhile** turning basically into a faint yet clearly visible star with **a cone-shape light shining downward**. i dont see that being military tech just my honest observation

<https://www.youtube.com/watch?v=CiOKaOJDnj4>

Moneymannn // <https://www.youtube.com/watch?v=rvMgcHsII1A>

you need congressional and international approval to even test a "missile with no warhead" they didn't have approval didn't let anyone know. Fuc4 all of that. **I know what I saw** and my grandfather is a vet and so is my cousin they both agree **this is no missile at all** there's absolutely no way that a missiles tail fire has **a flame which is hundreds of miles wide**. This isn't even a flame .

When I saw it , which I saw with my own 2 eyes, it was just **a sitting dot in the sky** , it then started moving **different directions** , expanded the dot of light and then shot the blue beam / cloud of smoke , **the smoke literally spiraled** and the main white dot / light ?

Yeah that completely disappeared it didn't fall to the ground and you see that. You also see the blue is still there ..but where is the main object ??? You would still the white light falling.

Where's the recovery? Lol boy I tell you . The reason it was "meteor remnants then a 'naval missile test' off the coast of , Kentucky , then Southern California," is because they fuc4ed up their story and they don't know what it is but they also know the people would want evidence.

=====

<https://www.youtube.com/watch?v=bb87kpztOG4&t=88s>

Gabby Enciso == in Carlsbad, California we saw it and it looked **super close** and it like exploded and it exploded **into a spiral** but after **it was scanning back and forth** for about ten seconds and a couple minutes later it just disappeared.

<https://www.youtube.com/watch?v=rvMgcHsll1A>

syntax323 == ... It was visible from multiple west coast states. I saw it and I'm in Arizona. Videos from Arizona all over YouTube. **I said it was a nuclear detonation in space.** No other it would be seen from so many states if it wasn't in space. Just how it looks and videos from it exploding, I'm betting nuke detonated in space. For what reason? I have no idea. If it was a test I can't imagine why they would want it so visible and than they don't give any answers about it. Maybe they blew up a satellite? or something else? Was it out defense system attacking something?

TheFlyestNavajo == +secureteam10 Bro I saw that with my own 2 eyes. It was NOT a missile! No way in hell! I am just happy I got to see a UFO with my own 2 eyes. I was already a believer, but now I know for a FACT that UFOs are here. If it was a missile what shot it? Cause there was nothing that it came from. **The govt think we stupid.** I am in Millbrae, CA and it was NOT a missile!

mick == Naval test hahahahahahaha they could've came up with something better than that!!

=====

<https://www.youtube.com/watch?v=bb87kpztOG4&t=88s>

Owe Foe == U.s. trying to cover up with a lame ass excuse thats it was a rockit test. Rockit test my ass rockits dont fuccking **hover.**

Dante Richardson // <https://www.youtube.com/watch?v=rvMgcHsll1A>

- No way trust me I saw this with my own eyes. This was no missile and reported in three states so far! **It was up close!**
- +Francisco S I know what I saw my friend! I am very analytical and can separate my emotions and lack of understanding and let the observation speak for itself. This didn't act or feel normal at all. **The light was beaming down one direction then pulled back then project the light away in the other direction.** The strange thing is that in the area it was in there was **what appeared to be fog** but everywhere else was clear.
- I emailed you pictures and some videos I tried to take but It was at the tail end of the sighting. This was no normal light I can tell you that. It tracked through the sky and the light stretch and then formed back into one light source after doing **the search light effect**. It was silent. I was thinking helicopter at first but no way! No sound and not a normal light or motion.
- <https://www.youtube.com/watch?v=FyWccT3E904>
- Dking == i just saw the same thing on 11/8/15 and it made **a exploding sound** and a **ball of Smoke Spread around it in all most perfect circle** and it the change color from orange before the explosion to white and then slowly just went away

Random comments

- angel salas == if you guys look at other videos from this thing, you will see how this thing spirals like crazy....and while its sitting in one spot theres a **blue beam coming out of the center of it**. When it dissappeared it left behind a green colored fluorescent cloud that stayed there for a while
- T Miller == I live in the bay area, a friend of my daughter's posted a video from her back yard and **this thing was NOT moving**. It was **hovering and changing colors**. Not a missile.
- Adam == this sighting was really bizarre. **I was very close to it** as well. when **it passed over me** it was quiet as the night. it was really fast and left behind a translucent green trail. almost like it was radioactive or something. **it also left behind a terrible smell**. I tried to take a picture of the green trail but as I did **my phone froze up**. and when the picture finally came out it did not look green in the picture. a very bizarre sighting indeed
- sarah roberts == a test missile. Really !? Can a test missile give out that much light ? Why are we testing lights on missiles?! what explains that bright light? No missile has the technology to produce that bright light
- Alma alcantara == I saw this I was in my backyards on my trampoline and I see this **yellow ball** and it was going up and then it exploded and then it look like Wat was in the video and then there was **a blue blob in the middle of all that smoke** it was weird.
<https://www.youtube.com/watch?v=MBkj9QKwYHo>

arensel84

That fog was directly above me in Bakersfield! **I saw it stop at least twice**. the colors glowed like a plasma/mist for 20 mins after. we see missile launches from Vandenberg and Edwards afb. this was nothing like a missile launch we've seen before.

I saw it in Bakersfield, ca. looked like it was directly overhead. I thought it was a helicopter search light at first, but no sound and it's brilliance could not be ignored. **after the search light effect**, amazing colors began to replace the light and lingered directly above as a plasma/mist.

the object began going northwest **then appeared to stop** and look like a star. after looking stationary, it rapidly moved directly up in the far west sky. **as it went up, it had a teardrop tail, not similar to a rocket exhaust.**

after it was gone, we could see the **green illuminated plasma/mist** linger for about 20mins. this was bright enough to be convinced **it had illumination to it.**

I have seen many military rocket launches that the news here routinely gives us the heads up about. this is the first in 20yrs of memory that has had no warning. I saw many airlines in the sky seemingly very close to this object.

in my experience, rockets leave an exhaust trail that zigzags as the air currents move it. this left no exhaust one would associate with fossil fuel burn. this was like nothing seen before.

if it is a missile/rocket, there's got to be many countries west of usa that are not happy there was no warning and we chastise other countries when they openly announce plans for a test fire. some ppl saw this from Ohio. that's nuckin futs!

- arensel84 == we are all in disbelief here because we have seen many launches that the local news reports beforehand. **if it's a missile, they have new energy technology the public has not seen till now**. it moved **3 different directions and stopped twice**. the last move was **straight up** at a 90 degree angle into space. this was truly unique and exceptional from all previous witnessed missile/rocket launches.
- LordSwitzer == before this thing lit up it looked like a yellow orb kind of like a Chinese lantern. then **the spot light turned on**. shortly after that it turned into a bright round ball of light and dimmed out leaving no exhaust trail as rockets do. i seen it and i highly doubt it was not a missile i seen. ;)
- broughy23 == You noticed the same things I did. I don't believe anyone has the technology **to make a silent missile that can change direction multiple times and slow down then speed up** like you said
- <https://www.youtube.com/watch?v=q5y7F7ucpqc> =====
- GDIRDY5 Gaming Streams == What the hell is this. Don't tell me it's a comet or a meteor, **it practically launched out of the mountain like a firework at first**.
- Han Daimond == Yeah, an asteroid or meteor **remains static and turns its personal gigantic flashlight on**

90K -- <https://www.youtube.com/watch?v=rvMgcHsll1A>

- yea man theyre full of sh1t to say thats a rocket, no exhaust trail, crazy blueish and green lights an errie aura left afterwards. not to mention how it **moved and acted and just blasted off into the sky**. and who the fuc4 test a rocket and aims it literally from the bottom end of a state clear accross to the other end and so close to cities and homes? and the lights why the fuc4 **would it need lights**? is the rocket afraid of the dark? ...
- So why no exhaust trail. Ive lived in cali my whole life and never seen this before. Not to mention missles or rockets dont **change direction multiple times and stay stationary multiple times**. Not to mention they didnt give any warning and fired it from the tail end of cali all the way clear accross the stay low as hell and clear over airports and cities. Im in san jose and i have plenty of friends who thought the ghetto bird was putting a search light on their houses till they went outside. Also that crazy yet enticing blue hue of aura didnt burst till it was over norcal and then shot into the sky. Cant trust the media or the government. ...
- They didn't even make up a good lie. We arent (most of us anyways) **that stupid**. No power in this world has the tech to make any projectile weapon do what that thing did. And if it was a missile why did it have or even **need lights that bright on it? Its not like a missile would need to see where it was going**. Even nasa space crafts dont have lights like that. If it were in fact a military missile we shouldve only seen the light from the exhaust. Even so though said exhaust **would not have been seen** in Nevada, arizona, ohio and even parts of mexico. Try again govment

90k

- And for ppl who wanna believe the media and the police need to understand that the government gets to them before they speak. Just think about it, if the sheriff's knew why didnt they announce like they normally would? Why be silent about it and hope no one notices? And why is only orange county being vocal about it? Why not all the other precincts all over cali **whose cities this crazy ass object flew over**? What would have happened if it is a missile(its not) and it hit a city? They gonna blame isis or puttin and russia? Also i have friend in the military and he said they would never test without notification and so close to cities and ppl.
- it was still seen from nevada, arizona and parts of mexico. ppl in Puerto Vallarta had reported seeing it. **Im sure ppl in nevada wouldnt see a stupid missile fly over cali, like u said our eyes dont see that far**. So explain that mr. Holmes.
- Florida had ppl report the same not to long ago. And you just said norway did as well. So now **we are to believe that multiple countries conduct test just as america does** and some how has the exact same tech. Come on u cant be **that ignorant**.

More from <https://www.youtube.com/watch?v=rvMgcHsll1A>

- Dakkar Nemo == +secureteam10 Military tests launch from the coast and head out to sea. **This came in from the sea, passed between LA and San Diego, and detonated over the Salton Sea.** It was escorted by a UFO (visible in DAB007 video).
- Brandon Teller == I was out in Hemet area, large city I Had a clear view due to being out tarantula hunting. This had 2 separate crafts following parallel with the large light with a possible third to the north west. **Going straight up.** The crafts Was very small hardly leaving a trace but you could definitely see a trail. I've seen plenty of tests being out on this side of the coast with space x and Jpl and the sub base in San Diego, the testing in penelton hell they are running convoys miles long down the 15 tanks on trucks and all the support behind them, this was not government. But it was definitely intelligent, first thought of mine was "rockets even icbms..**don't change direction**"
- DTS 187 == I saw it with my own eyes and i will tell you this, that was no damn missile. I feel so fortunate to have seen it. Why does the government always hide things from us?? It was clearly not a missile, and it was not a meteorite. If it was a missile, how could people from Utah have seen it? Nd **why would they launch a missile to the east** when the have the PACIFIC OCEAN right next to them. Something isn't right, and it's kinda sad some people believe everything the news and government tell you. PS look up trident ii d5 it looks nothing like what i saw. PPS All i want to know is, what was it?

young beast // <https://www.youtube.com/watch?v=rvMgcHsII1A>

Exactly these people don't get tired of getting fed the same old bullsh1t! I witnessed this sh1t first hand ! I live in Cali and when I saw this I immediately stopped the car hopped out and started recording. Let me tell you. First of all the government and the military can't get their stories correct. First it was "remnants of a meteor shower" then they realized niggas wasn't falling for that one so they said "it was a missile test" . Ok pause. There was **NO fire or trail of burning smoke**. Absolutely none. I witnessed this white dot **appear in the sky out of NO WHERE**, expand super wide and get **brighter then anything I've ever seen** in my entire life (almost like it wanted to zoom in on something to see what it was or as if it wanted to leave a message) then it shot a blue streak that left a thick straight line of blue smoke, **took off and disappeared**. I realized it wasn't a rocket/missile or meteor the moment this happened. Only thing left was a blue streak no white smoke nothing else.

We don't have this type of technology enough said. **I know what I saw**. For the most part there was no direction that it came from. It randomly appeared in the sky, expanded its white light as if it was about to abduct or destroy, shot off a blue streak & left a blue cloud , took off then disappeared . I knew it wasn't a missile the moment the blue stuff it shot out was still visible , but the white lights had shot off and disappeared. If it was a missile test or meteor remnants whatever it was would've hit the ground (the white light included) . I and millions of others would've saw the white light falling to the ground and it didn't.

Young beast [more posts]

I live in Lakewood next to long beach and WAs in la Palma I have my own footage and it was not a helicopter , missile or meteor remnants all that is a lie it was out of this world and it can be seen from more then one state there was reports outside of Cali as well, the closest states to us.

And the technology was literally out of this fuc4ing world nothing that we as humans are even capable of making. Wake up. Stop being the governments puppets. Millions are refusing to let this sh1t pass. It angers me and millions of others that they think they can simply continue feeding and passing off lies to mind control this fuc4ed up country. This is a never ending dark universe and you honestly think we're the only life because the same liars that told us what we saw was them said so? No way. Don't be a fool.....

Yes!!! Exactly they tried to cover it up so quick ! What you saw is exactly what I saw and what you thought is exactly what I thought ! It was not from this world it was really out of this world . The light appeared out of no where , it wasn't a missile , meteor remnants, or a helicopter, in **fact helicopters were chasing it at some point** (secretly). You could tell right away it wasn't a helicopter (it didn't have flashing lights on it nor was there ANY sound coming from it) it was a white dot , that expanded super wide , and **got brighter then anything I ever seen in this world** , then shot off **a blue streak/ beam** that left a cloud of blue smoke, then it took off and disappeared or simply disappeared. I knew it wasn't meteor remnants or a missile **for it to be dark and for me to be able to still see the blue color while the main white light disappeared** and they recovered no evidence of a missile or meteor remnants anywhere so they said it was off the coast . That is such a lie .

We cannot let the government / military get away with this bullsh1t ass lie of it being a "meteor remnant" oh wait scratch that they know we didn't fall for the meteor bs so they then resorted to calling it a "Ballistic naval test mission" lmao smh just listen to the name smfh get out of here. Wake up America. Don't be brainwashed by this government.

More...

- THCMIKE65 -- I saw this Tyler! I saw this at 6pm going and the 60west heading towards LA the light caught my eye it looked like it didn't belong right away. like I said I was driving I couldn't take pics or video but I can tell u this, **the light was bigger than any lights planes have** and the light seemed to stop at a certain point kinda like making a bubble after it faded like 4 5 minutes after 6pm also after I saw how they sent a good year blimp that came from north LA to fly above where the light seemed to be almost like someone wanted to confuse ppl by thinking it was just a blimp or something glad someone captured it on film
- I didn't see any other colors just the **light was so bright but it stopped at a certain point** which was weird. also I saw the light being blocked at a small angle **mostly shining south east** then I seen it throw bluish clouds after it vanished and the distinctive blue lingered for 5 to 10 minutes
- djdarena -- we were going the opposite direction on the 60 Freeway when we saw it. We were going from LA to Riverside area. We saw this thing in Ontario/Norco around 6 pm. This object took off like a plane somewhere in Corona area closer to 91 freeway (that direction) when we saw it in a first place. It had a yellow/orange color first. It was going perpendicular to 60 freeway, and **then it changed the direction towards us.** We saw a **triangle yellow beam** first, and then this thing released a green dusty cloud. Very scary and interesting at the same time. We stopped in Riverside to observe it. We saw only greenish/bluish glowing skies after that. There were few witnesses on the street, too

Herb Goldy = WATCH THE MISSILE FROM THE LAUNCH.

<https://vimeo.com/145029572>

Brittney seal == I believe it originated around Modesto I saw this thing closer then u see on the footage. It started with a Wight **beem of light** heading **straight up**. Than a huge purple cloud engulfed it like a mushroom it later turned blue. In my entire life I've never seen anything like it. I guess I can best describe it as a steroid rocket.

<https://www.youtube.com/watch?v=yu7mNmqqJJ10>

Lights in the sky above LA

<http://www.abovetopsecret.com/forum/thread1091608/pg1>

-- My friend saw a bright white light and then it went out then there was a UFO with **white and red flashing lights** way higher than a plane or helicopter then it disappeared leaving a weird green glow that turned into a green cloud with **a long blue streak across the sky**. I was able to get a picture of the hazy cloud and the blue streak.

BATTLEFRESH == OK guys I want to chime in because I happened to be tracking the object for about 15 seconds before it exploded. Here's the whole story:

The night sky is very clear above my house in **Rancho Cucamonga** and I've often seen satellites overhead. So tonight as I'm coming home I am kinda on the lookout for strange things again and as soon as I stepped out of my van I noticed a bright white light tracking across the **western** horizon. **It had a white beam coming from it and at first I thought it was another helicopter with a search light**. Just as the beam seemed to become more focused the orb exploded. It was absolutely beautiful and amazing. The haze kept expanding and the orb looked to "skip" across the atmosphere creating a 2nd explosion. I got some video of this as well.

Then my sister calls me concerned and tells me about LAX being shut down and I knew it was a missile drill of some sort. In my opinion it looked as if a missile or projectile was shot down. I suspect it was actually a test of our ballistic missile shield and **the beam was the laser interacting with the atmosphere**. The blue streak everyone can see is what's left of that beam.

Ats -- <http://www.abovetopsecret.com/forum/thread1091608/pg1>

TheScale == If this is what i saw at 6pm pacific time directly **to the south of my home** then it was a rocket launch. i got to see the last 2 stages and it was heading due west out over the pacific. a strange direction to go for a rocket launch since it requires abit more velocity to reach orbit. also its exhaust plume had a whitish green glow to it. im wondering if this could coincide with the launches nasa did on the atlantic coast last month that released barium clouds for a study. in there description of that launch they said it could leave a plume glowing blueish green or purplish red.

i took a picture but it looks like it couldnt pickup the glowing exhaust plume but imma try to give it a closer look once im done posting this and upload it to my computer. maybe someone who knows how to use some photo editing software can tweak it to bring out the plume.

thats the end of the staging and im not sure if there was a small booster on whatever seperated from the previous stage but when i was watching it u could actually see **alot of debris from the seperation sparkling around for quite a few seconds**, even abit longer then that video goes for. its too bad he focuses on the plume cause all the action is happening quite a ways off to the right of where the video ends.

<http://www.abovetopsecret.com/forum/thread1091608/pg1>

Tonycodes == ... it was so close to where i was it took up the half of the sky from the beach...so this vid was shot 45 minutes south from me... can you see that the angle in this vid shows it was heading inland... from my angle, close to the object, you can clearly see the angle was northeast after the "seperation" occurred. basically it was so close to the shore **the blue plume WAS over the beach** and my hood less than 5 minutes after the object fell apart.. **the wind carried it to the beach.. and it was not very high..** we have a new hotel here and the plume eventually got above the hotel

Game over man == I'm with [evil chimp] on that...missile story is a coverup. They've been tracking it from space for some time and new exactly when it was coming. **The video footage it's obviously descending. That is why so many helicopters were watching it.** The military controls the majority of satellites and tracking.

It doesn't make any sense if it was shot from a submarine near San Diego and meant to travel directly west over the ocean. It was extremely visible over Los Angeles and now I'm reconsidering it's direction.

Looking at Google maps the street I observed it from isn't sitting directly perfect NSEW, it's angled. So I would say that it was descending in a more **south to north direction.** It started off as an orange fireball that looks like a star in the video then has the light show and disappears. I think it's a mystery.

<http://www.abovetopsecret.com/forum/thread1091608/pg1>

Mash3d == Thanks for posting that video. I was driving West on the 210 in Pasadena around 6 PM when I saw it.

At first I thought it was **a low flying Helicopter with it's search light on**. It was extremely bright. Took a closer look while I could **without hitting the car in front of me**. Then I noticed a smaller bright flare on the end of it with a bright cloud behind it. The entire thing was on my left side **at about 45 degrees up** from the Horizon. It appeared to be moving towards the North West but that could also be an optical illusion.

For anyone that is wondering the section of the 210 I was on travels about 270 degrees direction before it makes a turn to the left and meets the 134 near the Rose bowl. From my perspective I would guess the direction of the cloud was about 215-220 degrees. That's just a guess because **the cloud covered a large piece of sky**. The cloud continued to glow for a good 10 to 15 minutes.

If that was an ICBM a nuclear war will be very pretty and spectacular, for about 30 minutes, then not so much.

NewsWorthy == Hey everybody, I was off highway 152 in Gilroy. I was eating outside Sonics and took a video of this thing at close range, you can see the fuel Vapor or whatever it is.

This was unlike any rocket/missile I have ever seen. **It was able to hover and change directions**. It was coming **directly overhead and then stopped for a minute** and just sorta Hovered/loitered for a minute. We actually thought it was a Helicopter because it was **FLASHING a REALLY REALLY BRIGHT white light towards us**... After a minute or two we realized it wasn't a helicopter when it stopped loitering and started heading NorthWest... Personally I think this was some new technology, it didn't make a sound and **was pretty close to us**. I'm not sure what kinda rocket can do that kinda maneuver and not make a sound... Pretty amazing.

OuttaHere == I witnessed the whole thing firsthand, was with my family going in to an appointment. I got no film footage but I clearly **saw a tiny, unblinking red light trailing the missile** before it ballooned.

Here's a Photoshop rendition
of what I saw:

The red light moved around in relation to the missile, sometimes closer and sometimes further away but **clearly following it**. It was pretty high up in the sky but towards the west and it was headed northwest. **The tail was so clearly defined that at first I thought I was seeing a helicopter shining a spotlight at the red light.**

I didn't film it because I only had my iPhone which is worthless at night and we were late for our appointment.

A photograph of a bright comet streaking across a black night sky. The comet's head is a brilliant blue-white point of light with a four-pointed starburst pattern. A long, slightly blurred blue-white tail extends from the head towards the bottom left. The background is filled with numerous small, distant stars of varying brightness and colors, including some blue and red ones.

ATS

Hieronymousanonymous == YOU need to look at the videos and photos and witness descriptions - then actually WATCH a REAL Trident missile video it looks absolutely NOTHING like this object - this object only extremely superficially looks like a comet or missile- and there's a damned good REASON it shares these superficial traits with them- it's a similar object on the most superficial level. **But it moves NOTHING like the missile PERIOD**. Also when was the last time that SO MANY govt, military, police, & civilian agencies got together IN THE EARLIEST STAGES OF A UFO ANOMALY EVENT and almost ENTIRELY had the SAME story? I'll tell you when: NEVER. Not only that- the discrepancies are as telling as well....

peacefulpete == This official rocket launch really **doesn't resemble** the light show just seen over California. How bizarre that an unexplained sight results in so many people arguing that it's something normal, even though it doesn't look like it. I'd have an easier time believing it was some exotic space junk burning up in our atmosphere. But **it just doesn't look like a rocket launch** which lacks in the glowing blue and green plasma, and the dramatic stages we just saw over Cali.

Also there is **the common sense aspect**: If the military really wanted to test a missile, they could do it over the ocean without making a strange light show. Or they could do it during daylight to avoid the light show. Or, if they really wanted to make a nighttime light show, they could ANNOUNCE it beforehand, so half the country isn't shocked and wondering what UFO seems to be flying over our country. If they announced it first, then no one would be freaked out and people would just watch it calmly, like the actual rocket launches.

So arguing "it's a missile test" **doesn't explain any of the common sense problems with what we all saw**.

posted on Nov, 8 2015 @ 12:44 PM

Newsworthy -- I took a decent short video but don't know how to post videos (never took the time).

Anyways the video I have shows it **coming up from the south but is coming from Over Land NOT water**.. But I think maybe that's because I'm on the coast by **Gilroy** (101/152 Sonics) it might have started over water but because it was coming Northwest maybe I was just at a point where its trajectory took it over NorCal for a few miles.

Also as to the loitering/hovering I observed: **It was coming Directly over head and seemed to pause for a minute or so, then became An EXTREMELY BRIGHT White light. Then Changed Direction and headed MORE WEST than North**, which it was originally headed Northwest but not so much West as the new Trajectory.....

^^^ I think what explains that is the rocket maybe was between booster firing stage or something and since it was coming directly at us seemed to not move for a minute. Then the next stage of the booster kicked on and that was the REALLY bright white light I saw, and maybe when that was igniting it also **changed its trajectory** more west and that's why it changed direction and seemed super bright for a second is because the booster turned toward us and appeared like a spot light from a helicopter..

The video I have is right after the flash/booster kicks on because that's what made me run to the car and grab my phone. Also it shows the green exhaust/fuel plume and there's a few trees between us and the rocket from our viewpoint. **We were facing directly south and the beach is directly west** of where we were. So that shows/proves it came over land here in NorCal for at least a short while.

Lights in the sky above LA

<http://www.abovetopsecret.com/forum/thread1091608/pg1>

- “game over man” posted on Nov, 7 2015 @ 09:02 PM == My friend saw **a bright white light** and then it went out then **there was a UFO with white and red flashing lights** way higher than a plane or helicopter then it disappeared leaving a weird green glow that turned into a green cloud with a long blue streak across the sky. I was able to get a picture of the hazy cloud and the blue streak. People on the street also saw military helicopters in the area.
- “Mr Wilcox 281” posted on Nov, 7 2015 @ 09:04 PM == Seen it here in Phoenix. My mother in law called right away from San Diego while it was happening. Very strange. **I don't think you would see a missile launch in CA from PHX.**
- =====
- Harrison Eric == I was in Terminal Island Federal Prison when this happened.. almost 900 inmates witnessed this firsthand. Unexplainable. Was told it was some kind of missile, but **it flew directly over my head** as I was walking the track outside
- <https://www.youtube.com/watch?v=bb87kpztOG4&t=19s>

HUGE UFO SEEN OVER LOS ANGELES

<https://www.youtube.com/watch?v=jGuYYBAT-Xk> 167,000 views

- ***Rational explanation:***

- kimmer6 == Remma, it was flying 18,000 mph, the exhaust plume gets much wider as it enters the vacuum of space. It looked slow because it was so far away, lit by the sun. It was launched far off the coast by a submarine, USS Kentucky, from a restricted zone in the ocean that has been marked as a gunnery range since WWII. The Trident missile was unarmed and flew over the empty Pacific Ocean and splashed down in the lagoon at Kwajalein Pacific Missile Test Station in the South Pacific. I worked on a Missile Tracking ship in the early 1980's and can tell you that they recorded massive amounts of telemetry data from launch to splash down. It never went over populated areas. The US and even the Russians and the Chinese knew where it was at all times. I can also tell you that Kwajalein has the brightest sun I have ever seen and whitest beaches. It will melt your eyeballs out if you don't wear top quality dark sun glasses outside.
- Rhonda K === Alfredo Pacheco Jr no way dude I seen this with my own eyes in vallejo ca **watched it for a good 25 min** along with my co workers . No way in hell this was some type of test no way

<https://www.youtube.com/watch?v=jGuYYBAT-Xk>

- 80s Guy == the Great Trident D-5 missile testing as claimed by our government, but the Trident has speeds of 18,050 mph (mach 24). **This thing is slower than a Boeing 737.**
- Jenn Lynn == This is no missile. **If it was it would not be blue and not disk shaped.** UFO's just look like missiles from far away.
- Monalisastyle Monime == I saw it, and there was absolutely **NO SOUND**, and **no kind of crash** either like some cop said on a news site. I saw the portion of it where, -out of **the blue green beam** light beam came the white light with a scope of light shining towards the blue green beam as the white light object flew what was from East to West, here in Fresno (Clovis, specifically), CA. People can't handle the truth cuz everyone barely has enough time to breath now a days with working to barely pay bills...people don't have time or the peace in their own lives to question what the hell the governments doing with all the life stresses. Thats how they keep it going, right under our noses....and I can not how quickly people are ready to believe the factless bs they feed the public.

<https://www.youtube.com/watch?v=jGuYYBAT-Xk>

- Andre Frazier == umm.... its neither a missile or a rocket.... its clearly not a rocket. and **pretty much the entire world has seen rockets blast off into space and the trail is much different**.... also.. if they wanted to "test" anything. The government isn't stupid. They test hundreds of top secret things IN PRIVATE.... where is the logic in doing "tests on experimental secret" tech. Only to show the world. Then report later. "OH UH, IT WAS JUST A MISSILE TEST" Thats stupid. And your logic here is stupid lol
- Mikee Loves Indie == So the American Gov say this was their missile they are testing. Then tell me. **How come this exact 'missile' is showing up over cities around the world?** Does loads of different countries gov just happen to be testing similar missiles, in the same time period, over their cities too?
- aaron moores == Its not a missile at all **its bright white** at the end of It I am 100% sure it be yellow or orange colour and tbh I have not got clue what it was but lets just say every government knows what it was
- SAUCE COMMENT == plus **you don't hear the shock waves of it breaking the atmosphere layers for example** I'm not sure yall don't remember the last time a space shuttle landed in santa monica everyone thought it was an earthquake but it was the shuttle that broke the atmosphere layer and sounded like a gunshot plus we would've heard this "missile" it could reach speeds up to mach 2 or 3 etc we would've heard it breaking the atmosphere layer and breaking the sound barrier

Massive Blue UFO Seen Over Los Angeles 10,917 views

<https://www.youtube.com/watch?v=NErLF1WnCYs>

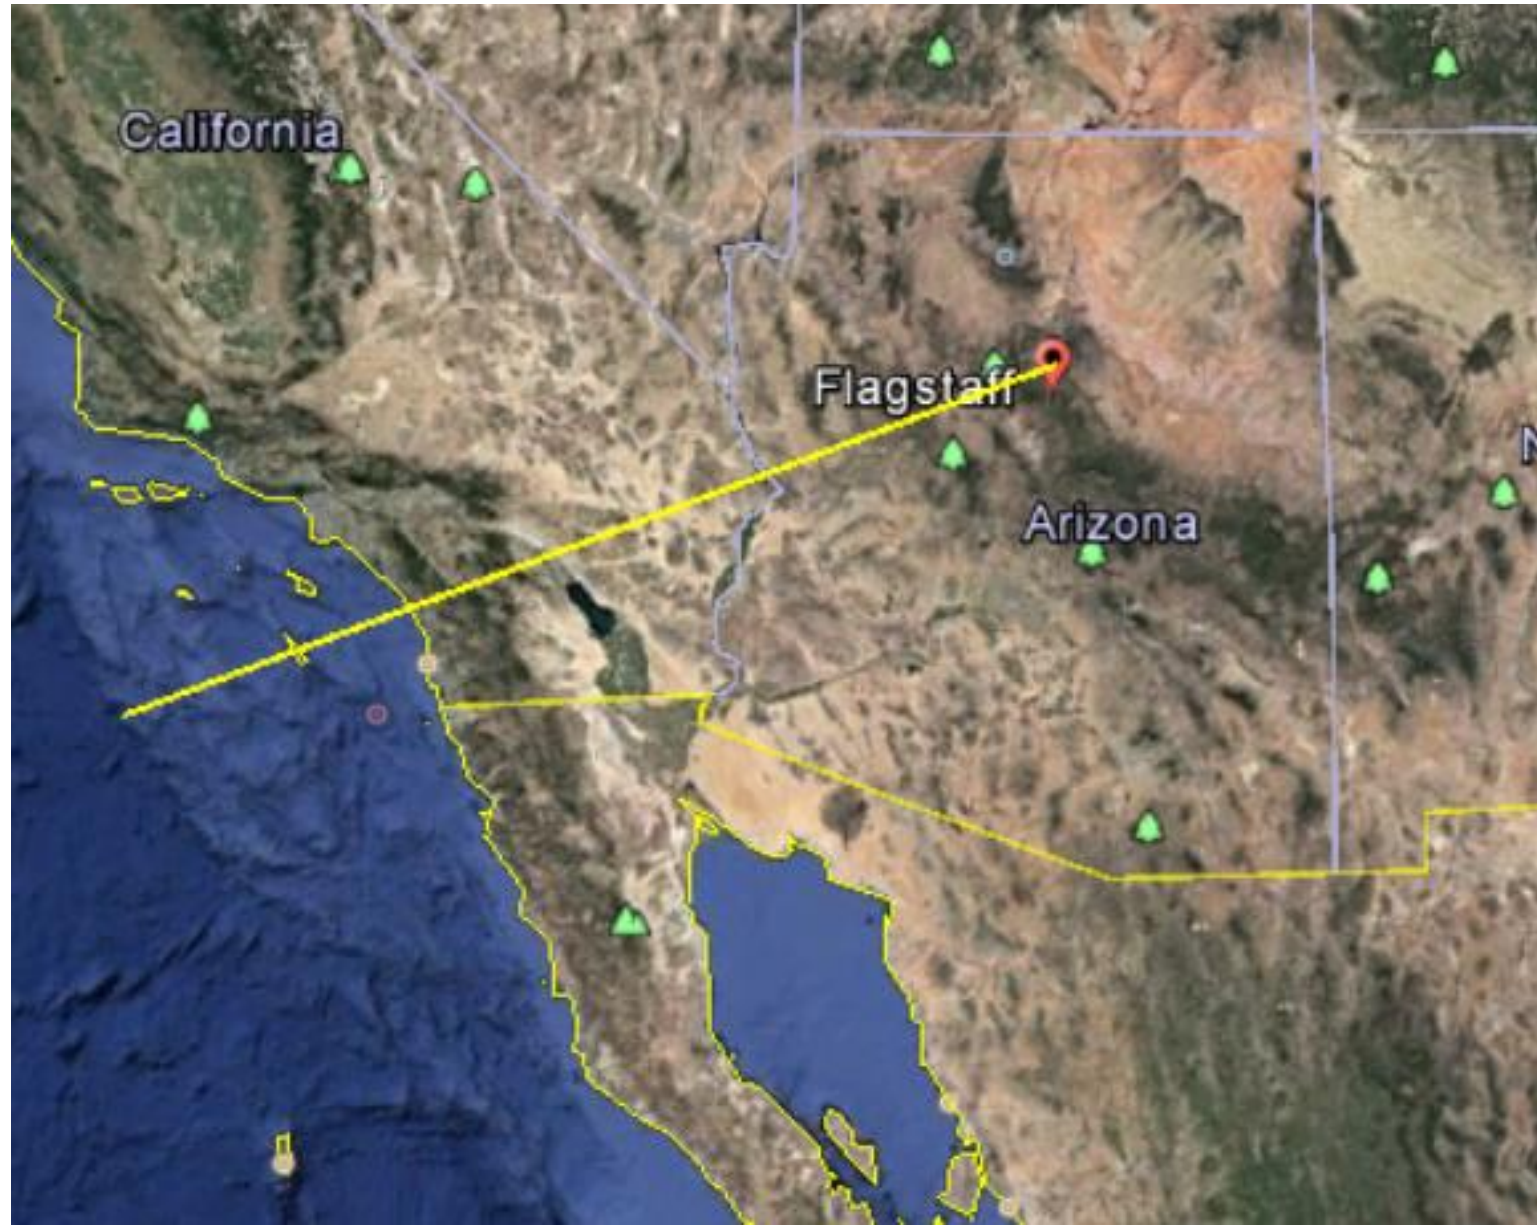

Streetcredstudio == **Everybody lost it** when a Navy missile test lit up the night sky over the west coast. Social media went nuts Saturday night because of reports of a bright light that appeared in the sky over the west coast. It was seen from San Diego to the San Francisco Bay Area. A Navy spokesperson told the San Diego Union-Tribune it was part of an unarmed Trident II missile the Navy test-fired from a submarine in the Pacific. It was planned, and no one was in any danger.

<https://www.youtube.com/watch?v=NErLF1WnCYs>

- Missouriiflies == I don't think that's a missile... **the plume reaches out too far too fast**...something doesn't add up
- pikniknb == What we don't know won't make us panic.
- Trill_Ej.415 == that's what the military says...u really believe that? A missile from the "Coast of the bay area from a submarine, but **it came from inland las vegas**"...People saw it from Mexico. How can a missile go from Las Vegas to San Francisco to just gone **in 10 minutes**? That's an 8 hour trip. A few hours from a jet. How is that a missile??? Think man
- sal alonzo == it doesn't make a sound .. so it's not a missile ... **Remember there is a sound barrier**
- Patricia moultrie == I just looked up the missile they said **it was and no similarities at all**

... and also reported
in Mexico!

- map

UFO mysterious light spiral in Tijuana Mexico 07/11/2015

- asgar3006 == Nombre, ya se habían tardado, Si que es un Espectáculo, ya lo puedo relacionar con las famosas Espirales que se han publicado antes, posiblemente éste es uno de sus orígenes, ESPECTACULAR // Name had already taken, if it is a spectacle, and I can relate to the famous spirals that have been published before, possibly this is one of its origins, spectacular!//
- CAR 77 == Ciertamente muy sorprendente, lo vimos desde la col. anexa roma eran las 17.58.. //Truly very surprising, we saw it from the Col. annex Roma, it was 17.58..//
- JAY Tafolla == muy buen video...en los Angeles,ca tambien se aparecio una luz azul 6pm // Very good video... in Los Angeles, CA also a blue light appeared at 6pm //

¿Ovni? ¿Extraña luz en Tijuana? Ejercicio militar, dicen autoridades // Ana Luisa Cid -- ~29,000 views

- El pasado 7 de noviembre, testigos observaron una luz muy intensa en los cielos de Tijuana y algunas ciudades de Estados Unidos. Según comunicados oficiales, se trató de un ejercicio militar de entrenamiento con misiles desactivados, de las Fuerzas Navales de USA. Dicen que no hay peligro, ¿será verdad?, ¿no hay misiles que pueden salir de control.
- On November 7th, witnesses observed a very intense light in the skies of Tijuana and some cities in the United States. According to official communiqués, it was a military exercise of training with missiles deactivated, of the naval forces of the USA. They say there's no danger, is it true?, Are there no missiles that can get out of control?
- Javier Rincon == Yo Vivo en Orange County en California y lo vimos mi hermano y mi Madre lo vimos , mi hermano lo Grabo en su cell phone , y esa Luz extrana Iba dejando un Estella de humo y casi se estampa con un avion comercial . Despues se miro como una Estrella con colores Amarillo-Naranja- Azul , luego se suspendio haciendo una sola Luz Blanca haciendo una burbuja , luego siguio su curso y se desvanecio la Luz
- **I live in Orange County in California and saw it, my brother and my mother saw it, my brother recorded it in his cell phone, and that strange light was leaving a star of smoke and it almost hit a commercial plane. Then it looked like a star with yellow-orange-blue color, then stopped making a single white light, making a bubble, then it followed its course and the light faded?**

+

- Novela El Poeta == Misiles con esas luces? obviamente que un misil no produce ese efecto de luz.
- Missiles with those lights? Obviously, **a missile doesn't produce that light effect.**
- El Lolo == Exacto, hay un video donde se muestra como los misiles no tienen aura, ademas caen y ese se mantiene en el aire
- Exactly, there is a video where they show how the **missiles have no aura, they also fall -- and this stayed in the air**
- antonio gomez == yo lo vi en Santa Ana ca este objeto primero expulso un gas toxico pienso y luego una luz la hizo azul y me acorde de los chemtrails yo estaba justo abajo de ella exterminio humano
- I saw it Santa Ana, Ca This object first expelled a toxic gas, I think, and then there was a light made it blue and I remembered the chemtrails I was right below this extermination of people.

URGENTE I ¿Ovnis, lluvia de meteoritos o misil al norte de México?

<https://www.youtube.com/watch?v=0tWy8kRq-YA> 8,923 views

- Expediente Punto Cero I Investigación [Nov 8, 2015]
- Los habitantes de Ensenada, Tijuana, Rosarito en México, y la Costa Oeste de Estados Unidos avistaron una luz que fue aumentando de brillo, empezó a rodearse de una bruma y dejar una estela, horas más tarde se sabría que se trataba del misil Trident de prueba de la Marina Estadounidense.
- The inhabitants of Ensenada, Tijuana, Rosarito in Mexico, and the west coast of the United States **sighted a light that was increasing in brightness, began to surround itself with a mist and leave a wake,** hours later it would be known that it was the Trident test missile of the US Navy.

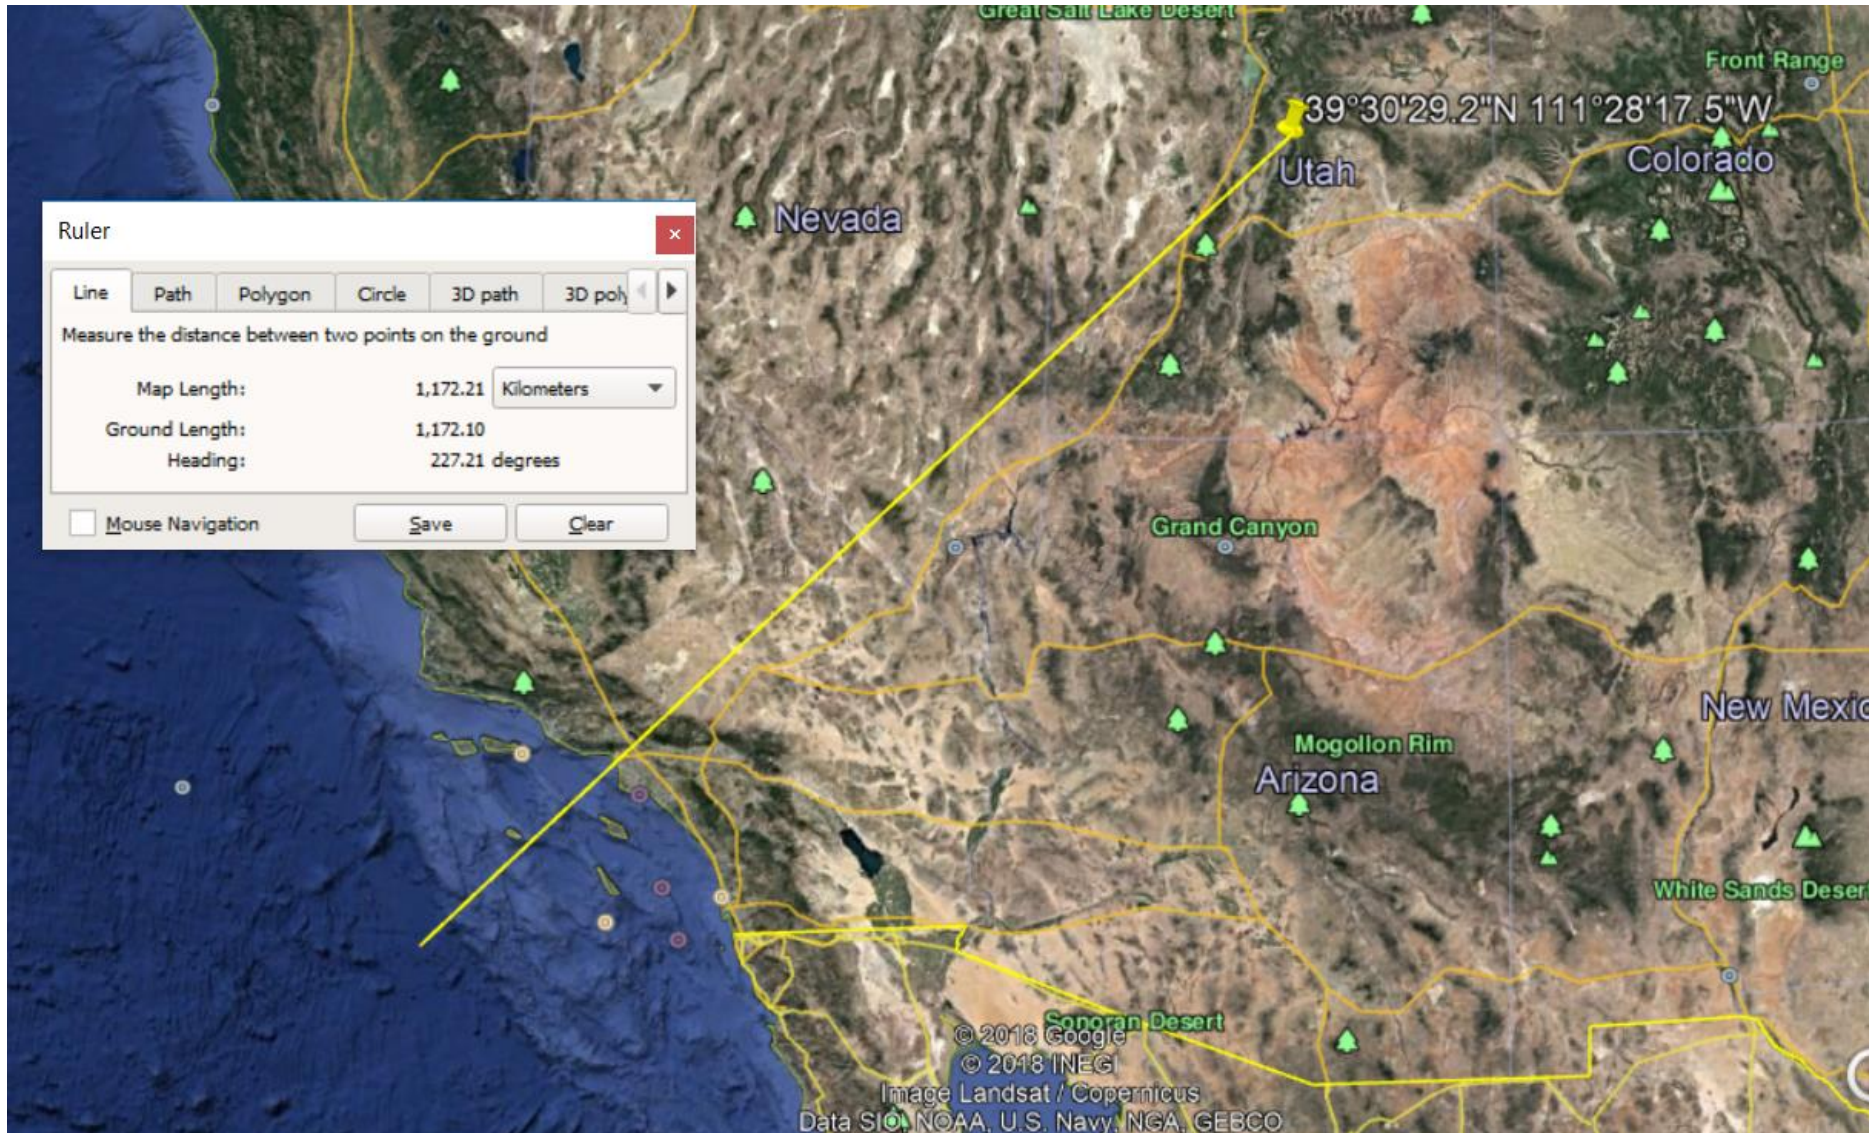

Q&A INTERVIEW WITH ACTUAL WITNESS

<https://www.youtube.com/watch?v=bb87kpztOG4>

- Sammi Brothersen [mid-April 2018]
- I seen this in the south/west sky, from central Utah ... it was so big we thought it was one of those haunted house/event type lights in a nearby town about 10miles away. Hmm strange stuff right I don't know how long it lasted i can't remember, but it seems like a few or several minutes idk. We kinda just wrote it off bcuz of thinking it was just like an event at the college or something like that. If I would of realized it was something more i surely would of paid alot more attention to it!!! (*What's really goin on).... seems like it was a blue-green from our view it was very low/horizon Southwest I was around this area---→ 39°30'29.2"N 111°28'17.5"W.... Hopefully that will help, let me know if it works or not

ABOUT 1200 KM TO MISSILE

Revisit to Nov 7, 2015 event on Dec 23, 2017 [SpaceX launch]

- FearlessFoxX == I don't know about it being a Missile, Becuase **it passed over here in Fresno** California and that night [Nov 7, 2015: JO] there was so many helicopters in the sky and police and my girlfriend said she was laying down and she felt a slight shake and noise, and it made her think becuase the neighborhood is always quiet , so she went outside and looked up and what she saw... Was quite crazy She reported seeing a pitch black dark octogan shaped object flying in the sky very low, infact so low she said she thought it was literally gona hit the tree, and even more crazy she said there was a couple helicopters chasing it and apparently the helicopters lights were off but you can hear them in the sky! But yeah if you want more info on this hmu on Twitter @fearllessforce I remember hearing so many helicopters flying around that night
- Hey man I just saw videos right this second that I guess the supposedly missile was launched again just tonight in La look it up! Watching it and knowing what we're capable of I just don't think it's a fuc4ing missile either! I think that your girlfriend's right and it's scaring the \$hit out of me because the government is slowly leaving bread crumbs of information about aliens actually being real and I feel like the \$hit's going to hit the fan and they have no choice but to disclose! And this is just another example of more activity than normal happening to the extreme! What are your thoughts? Did you guys see it tonight?
- **FearlessFoxX** == I seen a slight glimpse of it on social media, but haven't seen anything here in Fresno not sure if it's gona pass threw here again but if it does ima be on the look out, And yes my gf saw that and she posted about it as well, I'm not sure why they're doing this so called missile luanch or if it is a missile but apparently there's ufo activity around this thing it could be a ufo cover up, or could be a ufo trying to deactivate a missile there's been proof of this before too, either way it's sketchy asf and I'm not to trustworthy of the goverments input about this
